Information:

MOULD KING 24001 Lily Flower Artificial Building Set is a set of 178 pieces from which you can build a decorative white lily 24 cm tall. The model stands out with layered petals, a light green centre, a slender stem and adjustable leaves, so you can tailor its appearance to the display. The finished lily looks great in a vase, on a shelf or on a desk, and serves as a durable, low-maintenance decoration. It is an interesting project for lovers of building and plants, as well as a gift idea for people aged 8 and over.

Full product description

Build your own lily from 178 pieces

MOULD KING 24001 Lily Flower Artificial Building Set is a set that lets you create a decorative model of a white lily step by step. The construction consists of 178 pieces forming spreading petals, a light green flower centre, a stem and leaves. The building process engages attention and allows you to observe how a complete floral composition gradually emerges from individual parts. The finished model reaches 24 cm in height, so it remains clearly visible when placed on a shelf, desk or chest of drawers.

A plant decoration made from bricks

The white lily combines the characteristic form of a flower with a geometric structure based on building elements. The light petals contrast with the intensely green stem and long leaves, creating a striking yet calmly coloured composition. The model can be displayed on its own or combined with other brick-built flowers into a larger bouquet. It is an interesting way to introduce a floral motif into a room without the need for watering or regular care.

Layered petals and a decorative flower centre

The upper part of the structure has been built from many white elements arranged into open, layered petals. Their varied angles help recreate the form of a fully opened flower and give the model a three-dimensional appearance. In the centre are light green and cream parts imitating the inner elements of the lily. As a result, the composition looks interesting when viewed from the front, from above or at a slight angle.

A composition you can adapt to your display

The model is equipped with adjustable green stems and leaves, allowing you to change their position after assembly. The leaves can be directed more to the sides, raised or placed closer to the main stem, adapting the flower's silhouette to the chosen spot. This construction lets you experiment with the appearance of the composition without having to rebuild it. The lily can therefore take on a more spreading form or occupy less space on a narrower shelf.

A botanical motif independent of the season

The brick-built lily retains its shape and colour regardless of the conditions in the room. It does not require light, watering or replacing wilted flowers, so it can serve as a decoration for a long time. The white petals and green parts blend well with interiors kept in a light, natural or plant-inspired style. The model can also complement a collection of botanical constructions and become part of a larger arrangement.

For a vase, shelf or desk

The slender stem means the assembled flower can be placed in a decorative vase, creating an arrangement reminiscent of a classic floral display. The 24 cm tall model is also suitable for display on a bookcase, cabinet, console, desk or table. It does not need much space, and the spreading leaves and white petals draw attention and emphasise the three-dimensional structure of the set. The lily can be displayed on its own or paired with other plant-themed models.

A gift idea for plant and building enthusiasts

MOULD KING 24001 may appeal to people who enjoy building sets, interior decorations and nature-inspired motifs. The set is intended for users aged 8 and over and includes instructions guiding you through the successive assembly stages. Once built, it becomes an item that does not need to go back into the box, but can be used as a room decoration. The combination of construction activity and a decorative result also makes the set suitable as a gift.

Specification

Parameter	Details
Brand	MOULD KING
Model	24001
Set name	Lily Flower Artificial Building Set
Product type	Decorative brick-built flower model
Theme	White lily
Number of pieces	178
