Information:

MOULD KING 24013 Tulip Flower Artificial Building Set is a 132-piece set for building an impressive orange tulip with a green stem and adjustable leaves. The model stands out with its layered, open flower head and contrasting yellow-and-black interior, making it look realistic and decorative from every angle. Once assembled, it reaches approx. 25,5 cm in height and is perfect as a decoration for a vase, desk, shelf or chest of drawers. It is a creative project that develops concentration and patience, while also being a durable decoration with no watering or care needed. An ideal gift idea for lovers of flowers, bricks and stylish interior accessories.

Full product description

Orange tulip that you can build yourself

MOULD KING 24013 Tulip Flower Artificial Building Set is a set consisting of 132 pieces, from which an eye-catching orange tulip with a green stem and spreading leaves is created. The design is inspired by the appearance of a fully opened flower, and the layered petals create a three-dimensional and attention-grabbing form. The vivid orange colour pairs well with the green plant elements, making the finished model a decorative accent in a living room, bedroom, study or youth room. The set combines the pleasure of building with the opportunity to create a decoration that does not require watering or special care.

Elaborate flower form and decorative petals

The tulip head has been designed from many orange elements forming open, slightly irregular petals. This structure makes the model look interesting both from the front and from the side. The individual layers give the flower volume, while the shaped edges reveal its constructional character. Building the petals step by step allows you to observe how a recognisable plant form emerges from small parts. The finished tulip can be displayed on its own or combined with other brick-built flowers to create a more elaborate decorative arrangement.

Distinctive interior of the orange tulip

The inside of the flower draws attention with its contrasting colour combination. Black elements imitating stamens are accompanied by a yellow centre, which stands out against the orange petals and emphasises the tulip's open form. These details add variety to the construction and mean that the model is not limited to a simple outline of a flower. While building, you can learn how small parts are connected into more complex modules and see how the colour scheme affects the appearance of the whole composition. Once completed, the model looks good from above, so it can also be placed on a lower shelf, table or chest of drawers.

Creative building with 132 pieces

The MOULD KING 24013 set consists of 132 parts, making the build an accessible project that can be completed during one quiet afternoon. Assembling the individual sections helps develop concentration, patience and hand-eye coordination. The project may appeal to both younger builders and adult fans of flowers, decorations and collectible models. The moderate number of pieces also makes the set a good introduction to more elaborate plant constructions. Once assembled, it becomes a model with a practical decorative use that can be easily moved and displayed in different places.

Decoration for a vase, shelf or desk

The finished tulip reaches around 25.5 cm in height, so it can be placed in a small vase or displayed as a standalone decoration. The orange flower head stands out well against light furniture, books and muted accessories, bringing a warm colour accent into the interior. The model can decorate a desk, bookcase, bedside table, windowsill or reception area without taking up much space. Unlike a live flower, it keeps its appearance regardless of the season. The construction can also be part of a larger bouquet made from several MOULD KING plant models.

Adjustable stem and leaves

The model is equipped with a green stem and leaves, whose position can be adjusted to suit the arrangement being created. The ability to change the position of the plant elements allows the tulip to take on a more upright, spreading or slightly leaning form. This makes it easier to place the flower in a chosen vase and adapt its appearance to the display location. The adjustable sections also encourage experimentation with the model's arrangement when taking photos or combining it with other flowers. The green elements provide a clear complement to the orange head and give the whole construction a coherent botanical character.

A gift idea for a flower and building enthusiast

MOULD KING 24013 can be an interesting gift for someone who likes construction bricks, plant decorations or creative DIY projects. The recipient first takes part in the building process and then can use the finished model as a decoration for their interior. The orange tulip suits many occasions, including birthdays, Mother's Day, Christmas or a small gift without any special reason. The set is recommended for users aged 8 and over and can be built alone or together with a loved one. The finished construction combines the character of a collectible model with the form of a lasting decoration.

Specification

Parameter	Details
