Information:

MOULD KING 24014S is a decorative set of 152 elements from which you can build a slender arrangement with two purple flowers, a green stem and leaves. The model is 23,8 cm tall and is perfect as a subtle decoration for a desk, shelf or chest of drawers. The vivid colours and natural form add an elegant, floral accent to the interior, and the finished flower requires no watering or care. It is also a creative gift idea for fans of building blocks and nature-inspired decorations.

Full product description

MOULD KING 24014S - purple flowers made of bricks

MOULD KING 24014S Violets Flower Artificial Building Set is a decorative set consisting of 152 pieces, from which a slender composition inspired by purple flowers is created. The intense colour of the petals is paired with a green stem and leaves, so the finished model attracts attention and brings a subtle, plant-inspired accent to the interior. The flower does not require watering or special storage conditions, so it can decorate the chosen place all year round.

Two flowers with decorative details

Two purple flowers with rounded petals and contrasting yellow centres are placed on a single green stem. The individual elements form a layered structure that clearly refers to the shape of natural flowers. Green leaves arranged on the sides complete the composition and make the model look interesting both from the front and at a slight angle. The variety of colours helps to highlight each part of the plant-like construction.

152 pieces to assemble yourself

Building the model from 152 pieces allows you to create the stem, leaves, flower centres and characteristic purple petals step by step. Assembly is not only a way to prepare a decoration, but also an engaging activity that requires concentration and fitting the individual parts together. The gradual creation of the whole composition gives the satisfaction of a self-made construction, which can be used straight away as a decoration for a desk, shelf or chest of drawers once finished.

Plant decoration for home interiors

The finished flower looks good in a transparent, ceramic or coloured vase, making it easy to match to the room's décor. The purple petals go well with light wood, pastel accessories and natural materials. The model can serve as a standalone decoration or become part of a larger floral arrangement. Its form makes it suitable for the living room, bedroom, study, and spaces intended for learning or work.

An idea for a creative gift

The MOULD KING 24014S set combines the pleasure of building with the possibility of creating a lasting decoration. This type of gift may appeal to people who like bricks, plant motifs and unusual interior ornaments. The recipient first assembles the composition themselves and can then use it as part of their own arrangement. The purple colour scheme gives the model a calm and elegant character, making the flower suitable for many occasions and interior styles.

Slender construction with a height of 23.8 cm

Once assembled, the model reaches a height of 23.8 cm. Its slender form also makes it suitable for places where there is no room for elaborate decorations. The flower can be placed in a small vase, on a narrow shelf, bedside table or next to a monitor on a desk. The clearly defined stem and flowers positioned at the top make the composition remain clearly visible without taking up much surface space.

A floral composition for any time of year

Purple brick flowers bring a plant motif into a room regardless of the season. The model does not wilt and does not require care, so it can remain part of the arrangement for a long time. It can be displayed on its own or combined with other decorations in pastel colours. The combination of purple, green and yellow details brightens up the space, while the hand-built construction gives the ornament a more personal character.
