Information:

MOULD KING 24069 Heavy-Duty Container Truck is a 630-piece set for building a realistic container truck in a red and grey colour scheme. The model stands out with its massive cab, multi-axle chassis, large wheels and long cargo body inspired by port and logistics vehicles. The rear container doors can be opened to reveal the interior, while the refined cab details, lights and mirrors emphasise the industrial character of the build. Once assembled, the model measures approx. 26,2 x 8,9 x 10,2 cm and works brilliantly as both a construction project and a display piece for a collection.

Full product description

MOULD KING 24069 Container Truck

MOULD KING 24069 Heavy-Duty Container Truck Building Set is a set consisting of 630 pieces from which you can build an elaborate model of a truck designed for transporting containers. The red-and-grey colour scheme, solid cab and spacious cargo body give the construction an industrial character inspired by vehicles working in ports, logistics centres and transshipment yards. The model can be an interesting construction project, and once built it will also work well as a decorative piece in a brick vehicle collection.

Elaborate silhouette of the truck

The side profile of the model allows you to take a closer look at the proportions of the truck and the structure of its long container body. The multi-axle chassis, large wheels, side tanks and clearly defined wheel arches create a coherent silhouette of a vehicle designed for transporting loads. The combination of red, grey and black elements highlights the individual parts of the construction, making the cab, frame and container easy to recognise.

Details of the rear section of the container

The rear section of the truck has been recreated with double container doors, hinges and vertical structural elements taken into account. The enclosed body resembles the cargo space found in vehicles used for transporting goods. The refined finish of the rear section makes the model look interesting from different angles, not just from the driver's cab side.

Opening doors and visible interior

The doors at the rear of the container can be opened, revealing the interior of the cargo body. This feature adds variety to the construction and allows the vehicle to be displayed with either a closed or open container. Access to the inside also helps you better understand how the entire body is built and how the bricks forming its walls, floor and roof are arranged.

Distinctive cab with equipment details

The front section of the model draws attention with its elaborate cab featuring a large windscreen, mirrors, lights and a wide grille. Orange elements placed on the roof resemble warning lights used in vehicles working in industrial areas. Numerous small parts help recreate the character of a utility truck while also adding variety to the successive stages of assembling the set.

Construction project made up of 630 pieces

Building the truck from 630 bricks allows you to gradually create the chassis, driver's cab and container body. The varied construction elements mean that assembly includes both larger surfaces and smaller finishing details. The finished model clearly shows the arrangement of the vehicle's individual sections, and the top view highlights the length of the container as well as the width of the cab and chassis.

Dimensions of the finished model

Once assembled, the truck measures approximately 26.2 cm in length, 8.9 cm in width and 10.2 cm in height. These proportions make the construction sufficiently elaborate to showcase the vehicle's details, while still not taking up much space on a shelf, desk or in a display cabinet. The model can serve as a standalone decoration or as a complement to a collection of construction machines, trucks and logistics-themed sets.

Specification

Parameter	Details
Manufacturer	MOULD KING
Model	24069
Set name	Heavy-Duty Container Truck Building Set
Model type	Brick-built container truck
Number of pieces	630
Length when assembled	26.2 cm
Width when assembled	8.9 cm
Height when assembled	10.2 cm
Colour scheme	Red, grey and black
