Information:

MOULD KING 24113 Mini Potted Flower Builds is a set of 201 pieces from which you can build three different potted plant decorations: a bouquet of sunflowers, a fanciful green plant with red and gold details, and a pink flower tower. Each model has a different shape and colour scheme, and their compact size makes them ideal for a shelf, windowsill, chest of drawers or desk. It is an eye-catching decoration with no need for watering or light, combining creative building with a lasting interior ornament.

Full product description

Three plant compositions made from bricks

MOULD KING 24113 Mini Potted Flower Builds is a set consisting of 201 pieces, from which you can build three small plants placed in decorative pots. Each composition has a different shape, colour scheme and arrangement of elements, which together create a varied collection. The models look good displayed side by side, but they can also be placed separately in different parts of a room.

Plant decoration for a shelf or windowsill

The compact size means the assembled plants can be placed on a shelf, windowsill, chest of drawers or a small table. Yellow, pink, green, red and gold elements bring the surroundings to life, while the pots in brown and black shades give the compositions a cohesive look. This form of decoration requires no watering or access to light, so it can also be used in places where it would be difficult to care for live flowers.

Three varied models in one set

The set allows you to build three separate compositions: a green plant with red and gold tips, a bouquet of yellow sunflowers and a pink flower tower. The individual models reach approximately 8.5 cm, 10 cm and 10.2 cm in height, so they take up little space and are easy to fit into a home interior. The clearly different plant forms mean that, while building, you can learn different ways of constructing stems, leaves, petals and pots.

Sunflowers in vivid colours

One of the models features three sunflowers set on green stems in an orange-brown pot. Layered yellow petals surround orange centres, giving the flowers a three-dimensional and recognisable form. The varied stem heights help create a natural-looking arrangement, while the green leaves complete the composition and emphasise its plant-like character.

Whimsical plant with red and gold details

The second composition stands out with spreading leaves in several shades of green and decorative tips in red and gold. Asymmetrically arranged branches give the model a dynamic form and make it look interesting from different angles. The black, rounded pot contrasts with the lighter parts of the plant and helps highlight its whimsical appearance.

Pink tower of small flowers

The pink model creates a slender composition made up of many small flowers arranged on several levels. Repeating petal elements build a dense structure, while the green leaves at the base separate the floral section from the brown pot. The delicate colour scheme works well with the other plants, while still allowing this composition to function as a standalone decoration.

Creative building and decorating your space

Building the three plants combines a relaxing construction activity with the preparation of ornaments that, once assembled, can be used in a bedroom, study or workspace. The small models suit a desk next to a notebook, stationery and other everyday accessories without taking up much surface area. The set can also be an interesting gift for people who enjoy bricks, flowers and nature-inspired decorations.

Specification

Parameter	Details
Manufacturer	MOULD KING
Model	24113 Mini Potted Flower Builds
EAN	6937472000136
Number of pieces	201
Number of models	3 potted plants
Height of the green plant	approximately 8.5 cm
