Information:

MOULD KING 29006 Triceratops Dinosaur Fossil Building Kit is a set of 397 pieces from which you can build an impressive triceratops skeleton on a base inspired by a museum fossil display. The white bone structure, characteristic horned skull and black base create a stylish decoration for a room, desk or collector's shelf. Movable legs, tail and neck allow the model to be positioned as desired, and the plaque on the base emphasises its display character. It is a great choice for fans of dinosaurs and prehistory.

Full product description

Triceratops Skeleton

MOULD KING 29006 TRICERATOPS DINOSAUR FOSSIL BUILDING KIT is a construction set consisting of 397 pieces, from which an impressive **triceratops skeleton made of bricks** is created. Mounted on a base, the model is reminiscent of museum fossil displays, making it perfect as a decoration for a room, desk, shelf or a dinosaur fan's collection.

Prehistoric atmosphere

The white bone structure, characteristic horned skull and black base create a composition inspired by the world of palaeontology. The **brick-built dinosaur model** lets you recreate the silhouette of a triceratops in an exhibition form that attracts attention and helps bring the atmosphere of a natural history museum into the interior.

Model for display

Once assembled, the **triceratops made of bricks** looks interesting from different angles, so it looks great both on a collector's shelf and on a young dinosaur fan's desk. Movable elements such as the legs, tail and neck allow the model to be positioned as desired, and the base with a plaque adds an exhibition-like character to the whole piece.
