Information:

EXTRALINK Tablet CP31 WiFi is a practical tablet with a 10.1-inch screen, ideal for learning, work, browsing the internet and entertainment. It runs on Android 15.0, providing convenient access to apps, and 128 GB of memory allows you to store photos, videos, documents and files. The 2 MP and 8 MP cameras are suitable for video calls, remote learning and simple photos. WiFi connectivity enables comfortable use of the internet at home, at school and while travelling. The green casing gives the device a distinctive appearance.

Full product description

EXTRALINK Tablet CP31 WiFi Android 15.0 Green

EXTRALINK Tablet CP31 WiFi is a practical device for everyday use of the internet, applications, educational materials and multimedia. The 10.1" screen offers a comfortable workspace for browsing websites, watching films, reading documents and using messaging apps. The green casing gives the tablet a distinctive look, making it a good fit for home, work, school or travel.

10.1" screen for learning, work and entertainment

The 10.1" display allows comfortable use of the tablet during many everyday tasks. This format works well for watching films, making video calls, browsing photos, reading e-books, working with documents and online learning. The larger screen area makes apps easier to use than on a smartphone, while the tablet remains handy and easy to carry.

Android 15.0 and convenient access to apps

The tablet runs on Android 15.0, which allows you to use popular apps for communication, work, learning and entertainment. The intuitive interface makes it easy to quickly find the functions you need, and access to the Android ecosystem means the device can be tailored to your own needs. EXTRALINK CP31 is well suited as a family tablet, an educational device or a mobile tool for everyday tasks.

128GB of storage for files and multimedia

The built-in 128GB storage provides space for apps, photos, documents, films, notes and other files used every day. As a result, the tablet can serve as an entertainment hub, a handy learning tool or a practical device for working away from your desk. This capacity helps keep the materials you need close at hand without having to delete data frequently.

2MP+8MP cameras for communication and photos

EXTRALINK Tablet CP31 is equipped with 2MP+8MP cameras, which help with everyday communication and simple information capture. The tablet can be used for video calls, taking photos of notes, scanning documents, remote learning and staying in touch with family or colleagues. It is a practical solution for users who want one device for browsing content, working and online communication.

WiFi connectivity and mobile convenience

WiFi connectivity allows you to use the internet at home, in the office, at school and anywhere else with a wireless network available. The CP31 tablet is ideal for browsing websites, watching online content, using email, messaging apps and educational applications. The handy design and green finish make the device well suited to everyday use by children, teenagers and adults.
