Information:

Xiaomi Smart Desktop Air Circulation Fan is a compact, smart desk fan for the home, office and bedroom, combining powerful airflow with 3D circulation. It offers an airflow of 1180 m³/h, a range of up to 10 m and automatic movement of 120° horizontally and 100° vertically, so it distributes cool air evenly throughout the room. It operates quietly from just 28.4 dB(A), has 100 speed settings and convenient control via the Xiaomi Home app. USB-C power allows you to use an 18 W charger or a power bank, while the compact base, carrying handle, easy cleaning and child lock enhance convenience and safety in use.

Full product description

Compact fan with 3D circulation

Xiaomi Smart Desktop Air Circulation Fan is a **compact desk fan** for the home, office and bedroom. It combines powerful airflow with **whole-room air circulation**, so it quickly freshens the room and distributes cool air evenly. It takes up little space, yet performs like equipment for larger areas.

Key benefits

- **1180 m³/h** airflow – refresh the room faster and shorten the wait for a noticeable difference.
- **Range up to 10 m** – the fan effectively serves larger interiors and is not limited to the immediate surroundings.
- **120° horizontally and 100° vertically** – air reaches different areas of the room without manually repositioning the device.
- **28.4 dB(A)** – quiet operation does not disturb sleep, conversation or desk work.
- **100 speed settings** – adjust the airflow to the heat, time of day and your own sensitivity to moving air.
- **Type C connector** – easier to power the fan from an 18 W charger or power bank, even away from a single room.

Lekki i przenośny

Obsługuje ładowanie przez złącze typu C

Automatyczne rozprowadzanie powietrza 3D

Cyrkulacja całego powietrza w pokoju w 3 minuty

28,4 dB(A) 

100 ustawień prędkości

Oszczędność energii

Easy to carry

The base takes up an area similar to **half an A4 sheet**, so the fan fits on a desk, bedside table and kitchen worktop. The **rear handle** makes it easy to move between rooms without grabbing the whole housing. It is a practical solution if you want to use one device in several places.

Effective room circulation

The device distributes air so that it covers not just one spot, but the **entire room**. With an output of **1180 m³/h**, it can exchange the air in a 20 m² room in about **3 minutes**. This airflow works well when airing a room with a window ajar, using air conditioning, or distributing heat from a radiator.

Even airflow

Automatic 3D air distribution works within **120° horizontally** and **100° vertically**, so the fan directs airflow where it is really needed. This reduces the effect of spot cooling and improves comfort throughout the room. In practice, this means fewer hot spots by the wall, by the window or by the bed.

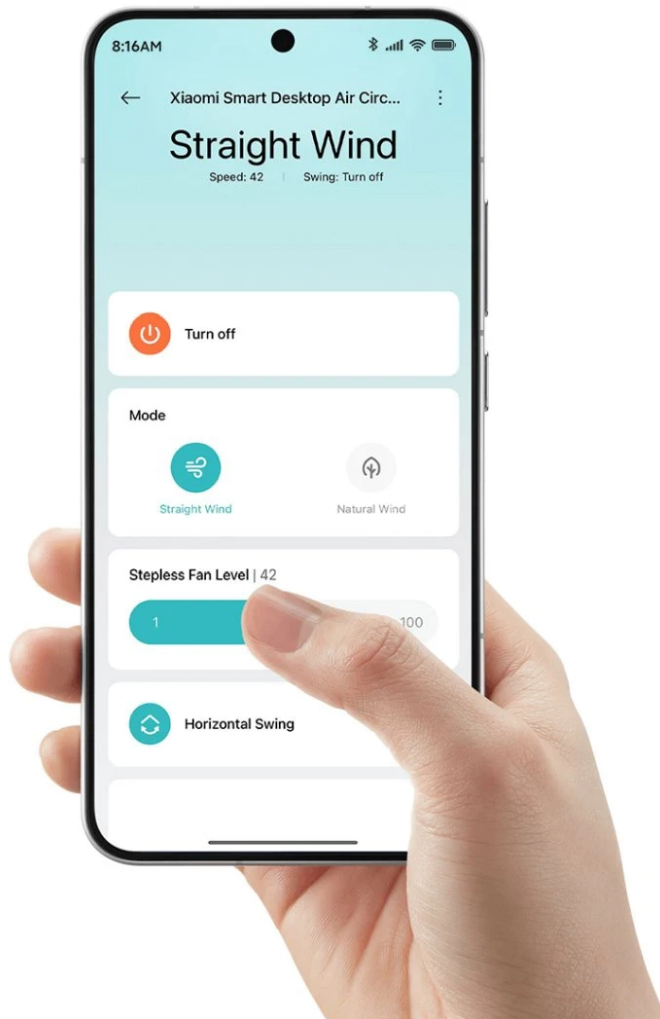

Quiet operation for sleep

At low speed and without oscillation, the noise level is only **28.4 dB(A)**. That is a level that does not disturb your rhythm in the evening or early in the morning. The **brushless DC inverter motor** maintains a stable airflow, so the fan does not run erratically and does not generate unnecessary noise spikes.

Precise airflow adjustment

100 speed levels give you full control over the strength of the breeze. You can set a gentle breeze for computer work or a stronger stream for a hot afternoon. Control via the **Xiaomi Home** app simplifies operation and makes it easy to match the airflow to current conditions.

USB-C power

The fan supports charging via a **Type C connector**, so you can use one power standard at home and away from home. You can connect the included **18 W** charger or use a power bank when you need cooling somewhere without a socket. It is a convenient solution for desk work, the terrace and travelling.

Lower power consumption

At speed 1 and without oscillation, power consumption is only **1.75 W**, and seasonal energy use is around **1.3 kWh**. That means cooling without a noticeable impact on bills. If you are looking for equipment for everyday use, this model combines convenience with economical operation.

Easy cleaning and safety

Detachable parts make thorough cleaning easier, and the **child lock** reduces the risk of accidental setting changes. The design with **dual ball bearings** increases operating stability and mechanism durability. As a result, the fan is suitable for homes where not only comfort matters, but also ease of use and safety.

Technical specifications

- **Product name:** Smart desk circulation fan
- **Rated voltage:** 12 V□
- **Model:** BPLDS10DM
- **Rated power:** 18 W
- **Product dimensions:** 324 x 200 x 334 mm
- **Noise emission:** ≤ 60 dB(A)
- **Power cord length:** 1.8 m
- **Net weight:** 2.0 kg
- **Wireless connectivity:** Wi-Fi IEEE 802.11b/g/n 2.4 GHz
- **Package contents:**
 - Fan
 - Power adapter
 - User manual
