Full product description

60 LEDs per meter - beautiful colors and high brightness

The **Govee RGBIC LED Strip Light M1** is a versatile and customizable lighting solution that features **individual control of each LED**, enabling a wide range of colors and lighting effects. It is equipped with a range of features, including **app control, voice control, music synchronization, timer function and easy installation**. With a high density of **60 LEDs per meter**, the Govee RGBIC LED Strip Light provides bright and even illumination, making it ideal for accent lighting, task lighting or interior lighting.

Key features of the Govee H61E1 LED Strip

- Ultra-high density of light beads: 60 LEDs per meter
- RGBIC with white light: high brightness in any space
- Multiple ways to control: Control the lights while you're away
- Group control: Control the other Govee lights simultaneously
- Versatile application: 64 scene modes, music mode, DIY and more

Greater density of LEDs

Govee RGBIC LED Strip Light M1 has a high LED density with **60 LEDs per meter**. This means that there are more LEDs per meter of light strip, resulting in a brighter and more vivid lighting effect. The high density of LEDs also ensures that the lighting is evenly distributed along the entire length of the light strip, with no dark spots or uneven illumination. This feature makes the Govee RGBIC LED Strip Light ideal for applications where high levels of brightness and uniformity are required, such as accent lighting, task lighting or ambient lighting.

RGBIC technology

RGBIC technology is the distinguishing feature of the **Govee H61E1** LED strip. It allows you to control each LED individually, which means you can create more complex and dynamic lighting effects. With RGBIC, you can create patterns, gradients and animations that are not possible with regular RGB LED strips.

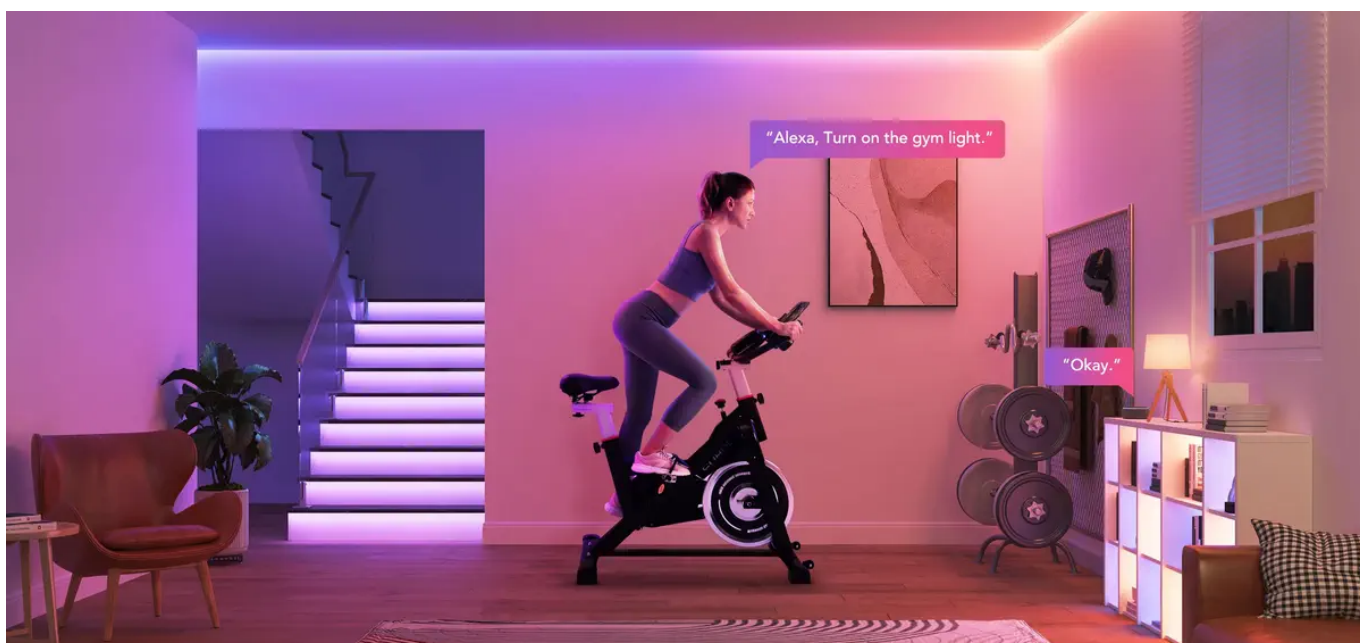

Watch in awe as all the Govee lights simultaneously pulsate to the beat of your playlists

Govee's LED strip light can synchronize with music, creating a dynamic lighting effect that changes to the beat of the music. You can choose from a variety of music modes and adjust the sensitivity to your preference.

Voice control

The **Govee RGBIC LED Strip Light H61E1** is compatible with both **Alexa and Google Assistant**. This means you can control the LED strip light with voice commands. You can turn it on or off, change the color, adjust the brightness and more.
