Full product description

Govee thermometer and hygrometer H5075

Monitor the temperature and humidity in any room with the **Govee hygrometer thermometer**. Stay up to date with temperature and humidity data at any time.

Govee H5075 Bluetooth hygrometer thermometer

Monitor temperature and humidity at home for a healthier lifestyle

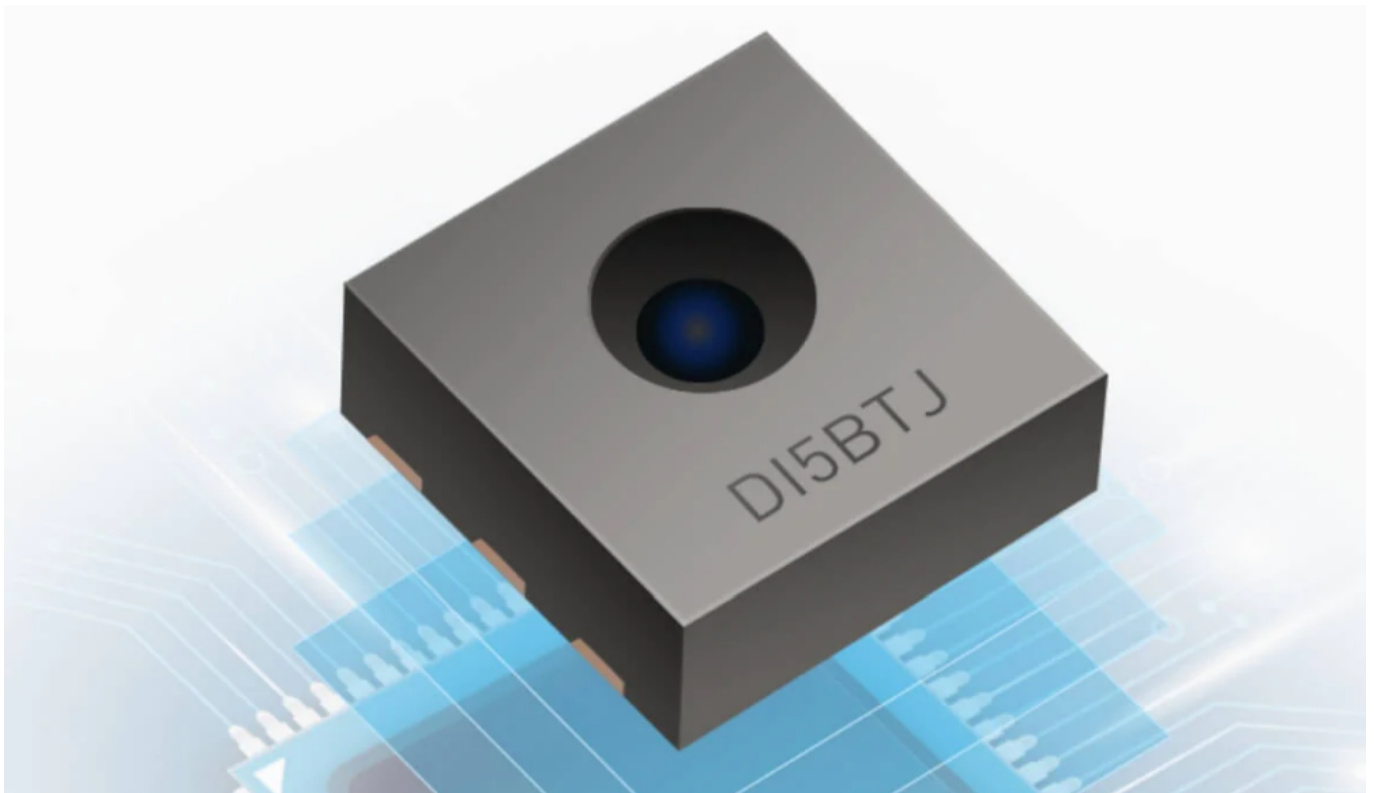

Covering the whole house

With a range of up to **60m**, Bluetooth connectivity allows you to remotely check data in the app at any time.

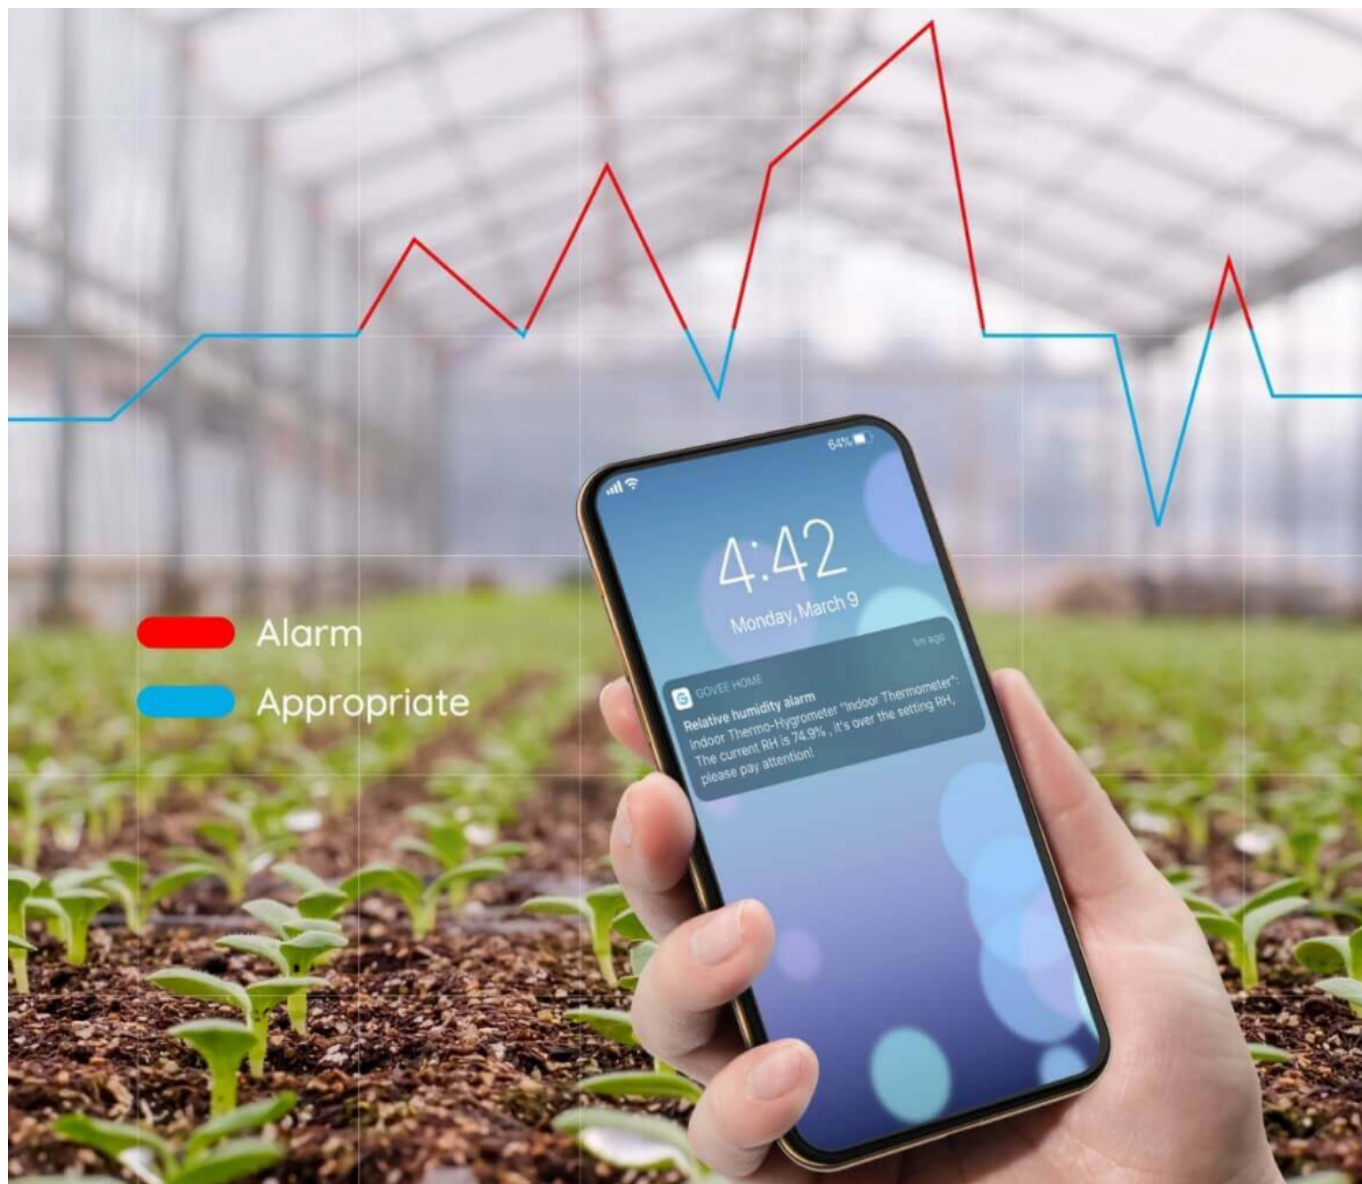

Accurate

Thanks to a Swiss-made sensor, its temperature is accurate to $\pm 0.32^{\circ}\text{C}$ and humidity to $\pm 3\% \text{RH}$. The **2s** response speed allows you to stay on top of your readings.

Alert via app

When the temperature or humidity exceeds the set range, it immediately sends an alert notification via the app.

Portable temperature humidity sensor

The stand and hanging hole on the back allow it to be placed anywhere. The portable design makes it easy to monitor.

Data storage and export

Ability to view **20 days of** temperature and humidity **records** and export data to **CSV** format, offering a clear path for data changes.

New smart connection with tower fan

The Govee Tower fan can automatically adjust speed based on temperature with **the Govee Thermo-Hygrometer**. It can automatically slow down the speed of the bladeless fan at night to avoid feeling too cold.
