Full product description

Govee H6004 smart RGBW bulb

Light up your bedroom, kitchen and more with these color-changing **smart bulbs**. With automatic timers, **Alexa and Google Assistant** control, and group sync, you can easily manage multiple bulbs.

Voice control with Siri, Alexa or Google Assistant

Manage your **LED bulbs** with simple voice commands via **Siri, Alexa or Google Assistant**. Simple tasks such as adjusting brightness, powering on/off or changing colors just got easier.

16 million colors

With countless color options, creating the perfect atmosphere for romantic dates or game nights is child's play. Enjoy a calming warm white(**2700K**) or a bright daylight white(**6500K**). Both meet your lighting needs.

Smart features and schedules

Prefer to have a soothing bedside lamp before bedtime? **Smart LED bulbs** come with an intuitive **timer function**. Create schedules where they will automatically turn on and gradually brighten until you wake up, or gradually dim at night before automatically turning off.

DIY (Do It Yourself) mode

DIY mode, via the **Govee Home** app, allows you to customize the colors and speed of up to five different lighting effects. More creative freedom gives you the ability to style your favorite spaces with vibrant colors and energetic lighting.

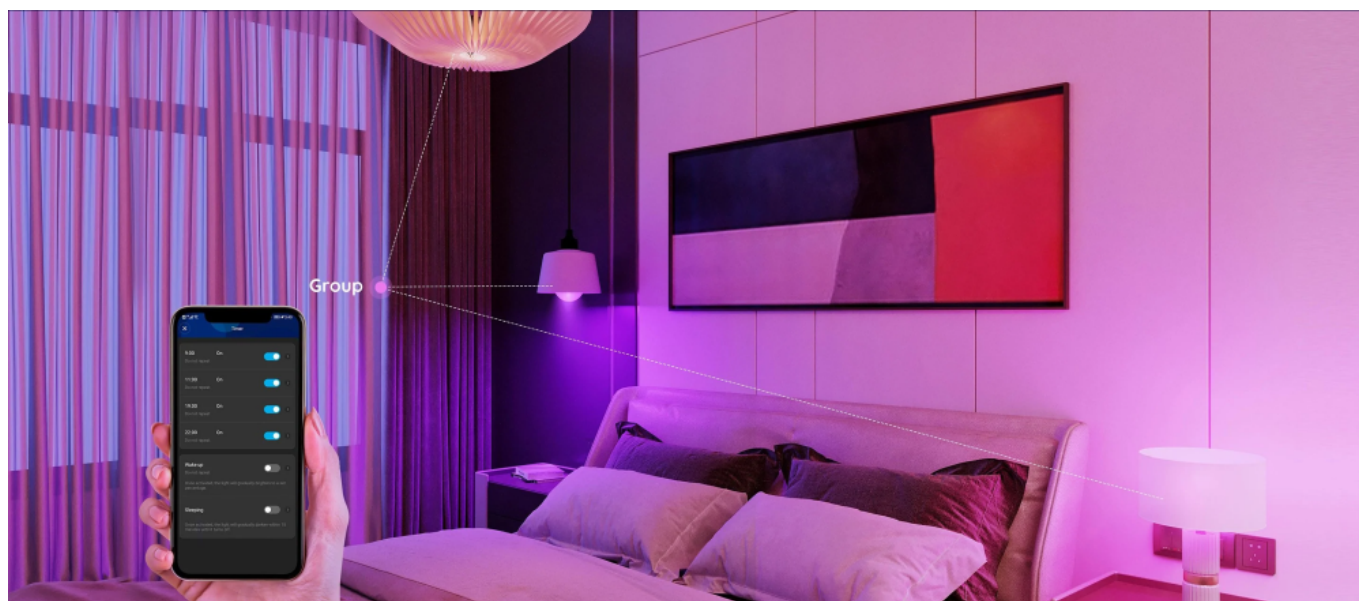

Mood-enhancing scene modes

Choose from **8 vivid scene modes** that are sure to energize your activities at home. Reading mode provides the calming atmosphere you need to enjoy a good book after a long day. Hosting a dinner party? Bring it to life with the candle mode.

The more bulbs, the better

The **group control** function allows you to manage several **LED bulbs** simultaneously. Turn them all on, change their colors or adjust their brightness levels with the touch of a button. With more lighting, bringing your bedroom or kitchen decor to life is effortless.

Control via the Govee app

With the **Govee Home** app, you can remotely control your **smart bulbs**, as long as you have a stable Wi-Fi connection. Enjoy access to color recognition, unique scenes and millions of colors, all for an amazing lighting experience.
