Information:

Xiaomi Bluetooth Speaker Essential is a compact, portable 5 W Bluetooth speaker designed for home use, travel and outdoor listening. It delivers clear sound thanks to a 1.5-inch driver and a large passive radiator that boosts bass and improves vocal clarity. Bluetooth 6.0 ensures a fast, stable connection, while the built-in microphone enables hands-free calls. The 1000 mAh battery provides up to 10 hours of use, and IP66 resistance protects against dust and water. The speaker supports stereo and multi-speaker pairing, as well as USB mode for computers and tablets, combining portability with versatility.

Full product description

Clear 5 W sound outdoors

Xiaomi Bluetooth Speaker Essential is a portable Bluetooth speaker for listening to music outdoors, at home and on the go. It combines **5 W power**, a dual-driver design and a compact housing, so it works well wherever mobility and clear sound matter. It is equipment for people who want to take music to a gathering, a trip or a walk without carrying a large speaker.

Key benefits

- **1.5-inch driver** – provides wide sound coverage in small and medium-sized spaces.
- **Large passive radiator** – enhances low tones and keeps vocals tidy without artificially boosting the sound.
- **Bluetooth 6.0** – maintains a stable connection and shortens pairing time with a phone or tablet.
- **Up to 10 hours of playback** – reduces the need for frequent charging during trips and meetings.
- **IP66** – protects against dust and water, so the speaker can withstand light drizzle and tougher outdoor conditions.
- **Stereo and multi-speaker pairing** – increases volume and expands sound coverage in larger spaces.

Konfiguracja akustyczna z dwoma przetwornikami

Kompaktowa obudowa, mocny dźwięk

Lekki i przenośny

Parowanie stereo

IP66 pyłoszczelność i wodoodporność

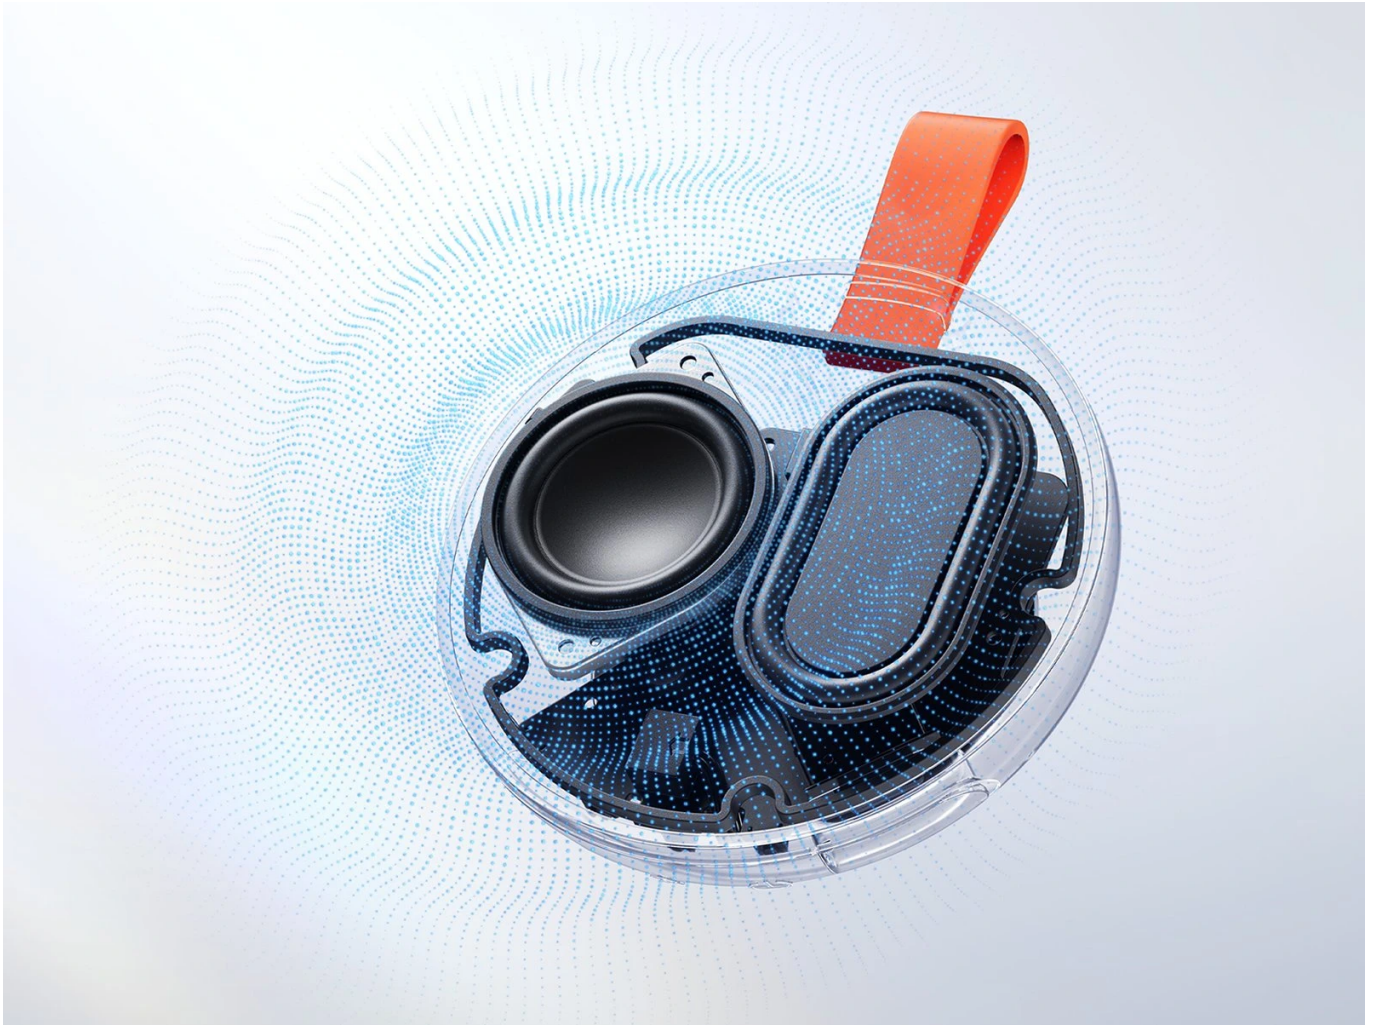

Do 10 godzin pracy na baterii

Stronger bass and clearer vocals

The sound is delivered by a system with a **1.5-inch full-range speaker** and a large passive radiator. This design results in a fuller low end, clearer voices and better instrument separation. As a result, music does not get lost in the background, and the rhythm remains clear even when listening outdoors.

Compact housing for carrying

The housing has a rounded shape and a fabric mesh finish that improves grip and gives the device a practical character. The speaker is **light and easy to carry**, so it fits comfortably in one hand and is easy to pack into a backpack. It is a good solution for people who want to listen to music without cables and without taking up much space.

Up to 10 hours of playback

The built-in **1000 mAh** battery provides up to **10 hours of operation** on a single charge. This battery life is enough for a few-hour meeting, a picnic, a weekend trip or a day of listening to music at home without constantly checking the battery level. Charging via USB makes everyday use easier.

IP66 outdoor resistance

The fabric mesh housing, anti-slip base and port cover increase stability when used outdoors. **IP66 rating** protects against dust and stronger contact with water, so the speaker is suitable for barbecues, on the terrace and in light rain. This is an important feature when the device is meant to work outside the home, not just on a desk.

Better stereo effect

The **stereo pairing** function connects two speakers in a left-right setup, giving the sound greater space and higher volume. For gatherings with friends, listening to music in the garden or while camping, this setup provides a fuller listening experience than a single speaker. In addition, the multi-speaker system allows synchronisation of a larger number of devices.

Fast connection and calls

Bluetooth 6.0 shortens the connection time with a phone, tablet or computer and maintains stable audio transmission. The speaker also supports **hands-free calls**, so you can answer calls without holding your phone. It is a practical solution when you are working at a computer, cooking or relaxing outdoors and want to quickly switch from music to a call.

USB for computers and tablets

Thanks to USB connectivity, the speaker can work as an external sound source for a computer or tablet. This is convenient when you want to improve the sound of films, online meetings or everyday desk work without extra accessories. One device therefore handles both outdoor music and a simple audio setup for work.

Technical data

- **Product dimensions:** 9.8 x 4.6 x 13 cm
- **Net weight:** Approximately 200 g
- **Colour:** Black/Green
- **Speakers:** Full-range speaker x2
- **Rated power:** 5W
- **Microphone:** Equipped with 1 microphone for Bluetooth calls
- **Bluetooth:** 6.0
- **Stereo:** TWS pairing (requires 2 speakers)
- **Multi-speaker pairing:** Supported (up to 10 speakers)
- **USB mode:** Supported
- **Rated battery capacity:** 1000 mAh
- **Charging port:** USB Type-C
- **Package contents:**
 - Speaker x1
 - User manual x1
 - Picture guide x1
