Price: **199.00 zł** gross / 161.79 zł net

Manufacturer: XIAOMI

Referention number: DNXGKLLJDRMLPI

Information:

Xiaomi Tag is a compact tracker for keys, wallets, luggage and other everyday items, compatible with Apple Find My and Google Find Hub. It makes it easier to quickly locate items via Bluetooth and a nearby device network, and Lost Mode lets you add contact details for the finder. The device offers over a year of battery life on a replaceable battery, weighs only 10 g and has an IP67 rating, making it resistant to dust and splashes. Privacy is also protected through location encryption and anti-tracking alerts.

Full product description

Compatibility and quick locating

Xiaomi Tag is a compact item tracker for keys, wallets, luggage and other everyday items. It supports **Apple Find My** and **Google Find Hub**, so it works with popular tracking systems and reduces the time spent looking for lost belongings. Thanks to Bluetooth connectivity and support for nearby device networks, you gain convenient access to the item's location in the app.

Key benefits

- **Support for Apple Find My and Google Find Hub** – it is easier to find items depending on the phone you use.
- **Remote locating** – you can check the location of your keys, bag or suitcase more quickly.
- **Lost Mode** – you add contact details so the finder can get in touch with you.
- **Over a year of battery life** – less frequent battery replacement and fewer interruptions in use.
- **10 g weight** – you can easily attach the tracker to items without noticeable extra weight.
- **IP67** – greater resistance to dust and water in everyday use.

Lost Mode

When something disappears from view, you can mark the item as lost and add a message and the owner's contact details. The person who finds the tracker will read this information on their phone screen or by tapping with NFC, depending on the network used. This scenario makes returning the item easier without unnecessary intermediary contact.

Privacy protection

Xiaomi Tag sends location data in **encrypted** form, so only you can see the position in the appropriate app. The system also sends an anti-tracking alert if an unknown Tag stays with you for an extended period. This solution reduces the risk of unwanted tracking and gives you better control over your data.

Long battery life

The device uses a standard, easily replaceable battery that provides **over a year of battery life** in everyday use. The app sends a low-battery notification, so you replace the battery in advance rather than only when the tracker stops working. This reduces the risk of interruption at an important moment.

Lightweight and compact design

The **10 g** body has compact dimensions, so Xiaomi Tag fits in a wallet, bag and on a keyring. It does not weigh down everyday accessories, while still providing constant access to location features. This design works well wherever a small size and simple mounting matter.

Dust and water resistance

The **IP67** rating increases resistance to dust, splashes and short-term contact with water under test conditions. In practice, this means greater peace of mind when carrying it daily in a backpack, pocket or with your keys. The tracker better withstands minor accidents that happen at home, at work and while travelling.

Sharing with family

Xiaomi Tag supports sharing access with other people, so you can assign selected items for shared use by family or friends. This is convenient for luggage, travel gear or items that often change hands at home. As a result, more people can check the location without passing the device from hand to hand.
