Information:

Extralink Home Pizza Oven Pro is a practical appliance for preparing pizza and other baked goods at home. The 1200W power ensures efficient everyday operation, while the compact design is ideal for the kitchen, kitchenette or when spending time with family and friends. The built-in viewing window lets you monitor the level of baking without lifting the lid, helping to retain heat. The thermostat allows you to adjust the temperature to suit the type of dough and toppings, and the timer makes it easier to keep track of baking time. It is a convenient and easy-to-use solution for people who want to bake pizza with greater control and without using a large oven.

Product features

Product colour	Red
Power	1200 W

Full product description

Home pizza making with Extralink Home

Extralink Home Pizza Oven Pro is a practical appliance for people who want to prepare pizza conveniently at home. The 1200W power means the oven works well for everyday use, and its design makes it suitable for use in the kitchen, kitchenette or during gatherings with family and friends. It is a solution for lovers of crispy bakes who want greater control over pizza preparation without using a large oven.

Viewing window for convenient baking control

The built-in window in the lid allows you to observe the pizza while it is baking. This makes it easier to assess how well the dough and toppings are cooked without constantly lifting the lid. This solution helps reduce heat loss during operation and contributes to more convenient meal preparation.

Thermostat for adjusting the temperature

The oven is equipped with a thermostat that allows you to adjust the temperature to suit the pizza being prepared. Temperature control helps adapt the appliance's operation to the thickness of the dough, the amount of ingredients and the desired level of browning. This is an important feature for people who like to prepare different pizza variations and want convenient control over the whole process.

Timer to make time control easier

The built-in timer helps keep track of baking time, which is especially useful when preparing several portions one after another. The ability to set the appliance's operating time makes kitchen organisation easier and lets you focus on the toppings, sauces or the next batch of dough. It is a simple feature that increases the oven's ease of use.

1200W power for everyday baking

The 1200W power supports efficient operation of the appliance when preparing pizza at home. The oven can be used when you want to quickly prepare a meal, reheat a ready-made pizza or bake your own creation with your favourite ingredients. Thanks to its electric design, the appliance does not require complicated installation and can be used wherever standard power is available.

A convenient appliance for the home kitchen

Extralink Home Pizza Oven Pro fits well with the needs of household members who enjoy quick and tasty meals. The appliance helps prepare pizza without switching on a large oven, which can be convenient during everyday cooking. It is suitable for classic pizza, small bakes and dishes that require temperature and time control.

Simple operation and practical use

Control knobs, thermostat, timer and viewing window form a set of features that make the oven easy to use every day. Extralink Home Pizza Oven Pro is an option for people who want to prepare pizza in a simple way, with the ability to observe the bake and adjust the settings to their own preferences. The appliance is suitable both for a quick lunch and for cooking together at home.
