Information:

Extralink BT-4000 is a multifunctional radio ideal for trips, camping and emergency situations. It offers FM and DAB reception, Bluetooth 5.0 for wireless music playback, and a 3.5 mm headphone jack. The built-in 4500 mAh battery also works as a power bank, and the device can be charged in four ways: via USB-C, a solar panel, a dynamo crank or AAA batteries. The integrated torch with 3 modes, reading light, warning light and SOS alarm increase safety. Its lightweight, compact and durable design, together with the telescopic antenna, ensure convenience and good reception in difficult conditions.

Full product description

Multi-purpose information source in all conditions

Extralink BT-4000 is a versatile radio that offers access to **FM and DAB** stations, allowing you to stay in touch with the world even in difficult terrain. Thanks to the built-in **Bluetooth 5.0** module and a **4500 mAh** battery, the radio serves as an entertainment hub and power bank for your mobile devices. The integrated **torch, reading light and SOS alarm** make it a key piece of equipment for any expedition.

Energy available from four different sources

Forget about problems with a flat battery thanks to **four charging methods**, which make the device ready for use in emergency situations. You can use the traditional **USB-C** input, solar energy via the **solar panel**, manual drive using the **dynamo crank** or standard **AAA batteries**. This variety helps maintain constant access to light and information, regardless of the availability of mains power.

Lightweight and durable design for every adventure

The housing made of durable **ABS, PC and silicone** materials protects the mechanisms from mechanical damage during hiking or fishing. The device weighs just **300 g** and has compact dimensions of **15 x 7.5 x 4 cm**, making it easy to carry in a backpack. Its ergonomic shape and low weight mean the radio is not a burden on long walking trips.

Intuitive operation and full control of settings

A clear **LCD screen** shows the current frequency and device status, while a dedicated **battery level indicator** allows you to plan operating time precisely. Quick switching between battery power and AAA batteries is made possible by a physical **power source selector switch**. In dangerous situations, a clearly marked button activates the **SOS alarm**, making it easier to call for help.

Clear signal reception in remote locations

The long telescopic antenna contributes to stable wave reception across the wide **FM (87.5-108MHz)** and **DAB (107-240MHz)** ranges. This solution makes it possible to listen to radio announcements and music even in deep valleys or on mountain peaks. The receiver's high sensitivity minimises noise, delivering clear sound in all circumstances.

DAB 107 – 240MHz

Wireless connectivity and discreet listening

Bluetooth 5.0 technology allows you to stream your favourite music directly from your phone, turning the radio into a portable speaker. For those who value privacy or want to save energy, a standard **3.5 mm headphone jack** is provided. This means you can enjoy sound without disturbing other tent or hostel occupants.

A key part of your survival kit

The Extralink radio is the foundation of an **evacuation backpack**, combining the functions of many devices essential in emergency situations. Integrating tools such as a **power bank, torch and alarm** helps reduce the space needed in your luggage and the weight of your kit. This solution looks after your safety, providing connectivity and power when they are needed most.

Multi-purpose lighting for any time of day

The device has **three torch lighting modes** that help you move around after dark or illuminate a campsite. The fold-out **reading light** hidden under the solar panel provides diffused light, making it easier to look at maps or books at night. In addition, the **warning light** function in blue and red significantly improves the user's visibility in emergency situations.

High-capacity power bank for your electronics

The **4500 mAh** battery makes the radio an efficient power bank capable of charging a smartphone, tablet or head torch. This is especially helpful during prolonged power cuts or multi-day camping trips far from civilisation. The robust design and **reverse charging** function help keep all your electronic gadgets working properly.
