Price: **129.90 zł** gross / 105.61 zł net

Manufacturer: EXTRALINK

Referention number: DNXXGKMLGRMMKI

Information:

The set of 3 LED warning lamps provides immediate and highly visible hazard signalling during accidents, breakdowns or roadside stops. The flares shine in 360° and are visible from up to 1.6 km away, increasing safety and giving other drivers time to react. The durable construction made of ABS, PC and TPE/TPR is impact-resistant, while the IP67 protection rating guarantees water resistance and reliability in difficult conditions. The devices offer 9 operating modes, including SOS and rotating light, as well as a torch function with a white LED. The magnetic base, folding hook and power supply from 3 AAA batteries make them easy to mount, simple to use and always ready for use.

Full product description

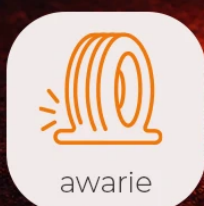

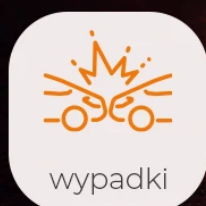

Immediate danger warning

The LED warning lamp is a key piece of equipment in emergency situations, such as **road accidents or sudden breakdowns**. Its intense light helps to quickly signal danger, significantly increasing the safety of all road users. The device provides support wherever **clear visibility** determines whether a collision is avoided.

LAMPA DROGOWA OSTRZEGAWCZA

doskonale sprawdza się w sytuacjach
wymagających natychmiastowego ostrzeżenia
przed niebezpieczeństwem

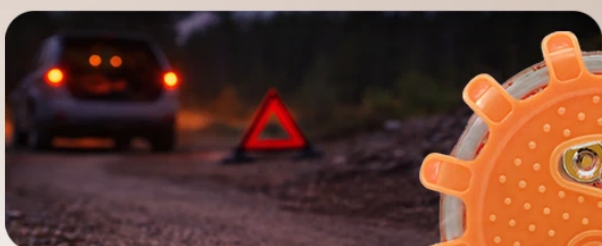

Durability in extreme conditions

The construction made of **ABS plastic and flexible TPE coating** makes the device resistant to crushing and impacts. Thanks to its **IP67 protection rating**, the flare remains fully sealed and waterproof, allowing it to operate during heavy rain or snowstorms. A strong magnet and power supplied by common AAA batteries mean the equipment is ready to work at any moment.

ODPORNĄ NA EKSTREMALNE WARUNKI POGODOWE

metalowych powierzchni

Thoughtful and multifunctional design

The device combines the functions of a warning signal and a torch thanks to the use of a **high-intensity white LED**. A sturdy rubber cover protects against shocks, and the **foldable hook** allows the lamp to be hung up or used as a stand. The inner ring consists of twelve AMBER LEDs that create a clear warning signal.

MOCNA I PRZEMYŚLANA KONSTRUKCJA

Simple and intuitive operation

Preparing the lamp for use is quick and does not require specialist tools, which helps in stressful roadside situations. **Easy access to the battery compartment** and intuitive fitting of the rear cover make the device exceptionally user-friendly. Solid screws ensure the housing remains fully sealed after replacing the power cells.

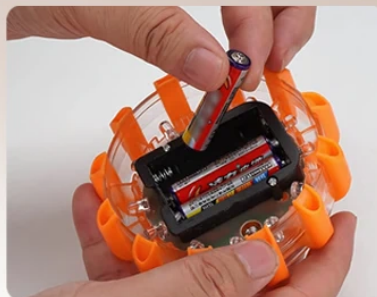

ŁATWA OBSŁUGA

Nine operating modes for complete safety

The lamp offers as many as **9 different lighting options**, including an SOS signal and rotating light, which can be changed with a single button. The use of **12 coloured and 3 white lights** helps adapt the signal to a specific incident. Thanks to the magnetic base, the flare can be quickly attached directly to the car body.

9 TRYBÓW MIGANIA

Wysoka efektywność i odpowiednia widoczność w ciemnościach

- ✓ 3 białe światła
- ✓ 12 kolorowych świateł

Visibility from a very long distance

The LED technology used makes the signal visible within a **360-degree radius at a distance of up to 1.6 km**. Such a long range gives other drivers the necessary time to safely carry out an overtaking manoeuvre. The device ensures that the breakdown site is **visible from afar**, minimising the risk of driving into an obstacle.

WIDOCZNOŚĆ W PROMIENIU 360°

Wysoka widoczność do

1,6 KM

Compact dimensions and portability

The small size of **10 cm in diameter** and the **low weight of 120 g** mean the lamp fits easily in a car glove compartment, backpack or bicycle bag. Such portability makes it suitable for hiking trips or camping, where it can serve as an additional light source. The **compact design** makes transport easy and ensures the signal device is always at hand.

KOMPAKTOWE WYMIARY

Łatwa do przechowywania oraz transportu

Technical specifications:

- **Contents:** 3 LED road flares
- **Material:** TPR + PC + ABS hook
- **Power supply:** Battery (3x AAA)
- **Flashing modes:** 9 different modes
- **Light source:** Coloured LED
- **Additional functions:** Coloured and white light (various configurations), magnetic hook for mounting
- **Advantages:** Waterproof, impact-resistant
