Manufacturer: WANBO

Referention number: DNXXGLNRIRMNHL

Information:

Wanbo ToGo Pro is a portable projector with a built-in 99 Wh battery, allowing you to watch films for up to 3.5 hours without being connected to mains power. It offers 1080P Full HD image, 500 ANSI lumens of brightness and a screen size from 40 to 200 inches, making it suitable for use at home, in the garden and while travelling. The Google TV system with Android 14 provides quick access to streaming apps, voice control and Chromecast. Automatic focus adjustment and ASA 3.0 image correction make setup easy, while the 360° rotating design allows projection onto a wall, ceiling or slope. Quiet operation, a built-in 8 W speaker, Bluetooth 5.0 and HDMI/USB increase ease of use.

Full product description

Portable projector with battery and Google TV

Wanbo ToGo Pro is a mobile entertainment hub that removes the limitations of traditional screens thanks to its **built-in 99Wh battery**. The device runs on the modern Google TV system, providing instant access to thousands of streaming apps and personalised recommendations *. It displays images in **1080P Full HD** resolution, delivering a cinematic experience anywhere, from the bedroom to the garden. Thanks to the integrated handle and compact design, carrying the projector is quick and convenient, making it the ideal companion for travel and outdoor gatherings.

Key benefits

- **99Wh battery** – provides up to **3.5 hours** of operation without mains power, enough for two feature-length films.
- **500 ANSI lumens brightness** – guarantees a clear and legible image with rich colour depth even in gentle lighting.
- **Google TV system (Android 14)** – offers direct access to **Netflix, YouTube, Disney+** apps and voice control via **Google Assistant**.*
- **ASA 3.0 technology** – automatically adjusts focus (**Auto Focus**) and corrects image geometry (**Keystone**) in a few seconds.
- **Quiet 27dB/m cooling** – eliminates distracting fan noise, allowing you to fully focus on the film soundtrack.
- **Sealed optical engine** – completely blocks dust, preventing black spots from appearing on the projected image.

Projection at any angle thanks to 360° rotation

The integrated stand allows smooth **360° rotation of the device**, enabling projection onto any surface – from walls and sloped ceilings to the ceiling itself. You can comfortably lie in bed and watch your favourite content directly above you, without the need for additional tripods or supports. The stable handle design keeps the **Wanbo ToGo Pro** in the chosen position, giving you complete freedom to arrange your home cinema regardless of the room layout.

Wireless content sharing via Chromecast

The integrated **Chromecast** function enables instant screen sharing from your smartphone, tablet or laptop directly onto a large display. With **Google Cast** support, you can stream films, photos and even presentations without cables. The projector also supports **Bluetooth 5.0**, making it easy to pair wirelessly with soundbars or headphones, increasing the projector's functionality in a home ecosystem. **

Screen size and throw ratio

With a **1.3:1 throw ratio**, the projector offers great flexibility in positioning relative to the wall, producing an image from **40 up to 200 inches**. Achieving an impressive 120 inches requires just **3.5 metres of distance**, allowing you to create a professional home cinema even in smaller rooms. Precision optics maintain sharpness across the entire projected image, matching the 16:9 format to the projection surface without edge distortion.

Mobile cinema with a powerful battery

The built-in high-energy-density battery allows for **3.5 hours** of playback in Eco mode, freeing you from the need to find a power socket. The durable casing with an ergonomic handle means the **Wanbo ToGo Pro** fits in luggage and is ready to use immediately after unpacking. This solution is ideal for evening screenings under the stars or watching matches on the terrace, where access to power can be limited.

Intelligent ASA 3.0 image setup

The advanced **ASA 3.0** system takes the hassle out of setting projection parameters, performing **Auto Focus** and **Keystone Correction** immediately after startup. The **Screen Fit** function adjusts the image edges to the screen, avoiding obstacles on the wall and reducing setup time to a minimum. Thanks to intelligent sensors, the device detects changes in position and corrects display parameters in real time, ensuring perfect frame geometry.

Clear sound with the PureSonic system

The integrated **8W speaker**, supported by an advanced **DSP (Digital Signal Processor)**, delivers rich acoustic experiences without the need to connect external speakers. This technology guarantees crystal-clear highs and deep, resonant bass that fills the room within a **360-degree** radius. Thanks to precise audio tuning, every word in dialogue is clear, and the soundtrack retains its dynamics both when watching films and listening to music.

Quiet cooling system operation

The advanced heat dissipation system operates at a noise level below **27dB/m**, making it almost inaudible in home conditions. Such a low noise level allows full immersion in the scenes being watched without distracting fan noise. The efficient airflow effectively protects components from overheating, ensuring stable operation of the **Wanbo ToGo Pro** even during hours-long film marathons while maintaining excellent build quality.

Versatile ports

The rear panel of the device is equipped with a set of essential connectors, including **HDMI 1.4** and a **USB port**, allowing you to connect external drives or game consoles. The **3.5 mm Jack** audio output enables connection of a dedicated speaker set or headphones, ensuring discretion during night-time screenings.

* Compatibility with streaming services was confirmed on the certification date. The operation of third-party apps depends on the policies and requirements of their providers. App availability and functionality may change without prior notice. To maintain compatibility, software updates may be required.

** Actual data transfer speed and streaming smoothness depend on the parameters of your network infrastructure, internet connection bandwidth and the capabilities of the home router in use.

The manufacturer does not guarantee support for third-party applications throughout the entire service life of the device.

Specification

- **Product name:** ToGo Pro
- **Projection technology:** Single LCD
- **Light source:** LED
- **Brightness (ISO):** 500 ANSI lumens
- **Video playback time:** 3.5h (Eco mode), 2h (Standard mode)
- **Resolution:** 1080 P
- **Contrast:** 2500:1
- **Throw ratio:** 1.3:1
- **Suggested projection distance:** 1.2 m - 3.5 m
- **Suggested screen size:** 40 - 120 inches
- **Operating system:** Android 14 (Google TV)
- **Memory:** 2G + 32G
- **Wi-Fi:** 2.4G + 5G
- **Bluetooth:** 5.0
- **Input voltage:** 100V ~ 240V ($\pm 10\%$), 50 ~ 60Hz
- **Noise level:** 27dB/m
- **Input interfaces:** HDMI*1 / USB*1 / 3.5mm*1
- **Focus adjustment:** Auto-Focus
- **Keystone correction:** Full automatic correction (Full Auto)
- **Intelligent cooling control:** Yes
- **Overheating protection:** Yes
- **Remote control signal:** BT + IR
- **Colour:** Dark blue (Dark blue)
- **Net weight:** 2.6 kg
- **Product dimensions (L*W*H):** 166mm x 159mm x 230mm (with handle)
- **Box contents:** Projector, user manual, remote control, power cable (AC Line)
