Energy efficiency scale	A to G
Suitable for indoor use	Yes
Energy efficiency class	G
Energy consumption per 1000 hours	2 kWh
Light colour type	Multi
Product colour	Black
Type	Smart strip light

Full product description

GOVEE H6098 - take your home theater to the next level

With the Govee H6098 Envisual TV Backlight, your movie experience will become more immersive than ever before. Immerse yourself in a dynamic play of lights that automatically adjust to what's being projected on your TV, creating a unique atmosphere in your living room.

Automatic color matching from TV image

The **Fish-eye Correction** technology used allows for precise color reproduction and elimination of image distortion. Thanks to this, LED lighting perfectly reproduces colors at the edges of the screen, creating the impression that the image goes beyond the TV. Your movies and games will now look more realistic and dynamic!

Bright and vivid RGBWIC LED lighting

Govee H6098 is distinguished by a **brightness of 30 LED/m**, which provides intense light and vivid colors. Compared to traditional LED strips, RGBWIC offers even greater color accuracy. Your home theater will take on a new glow with deep colors and dynamic light transitions.

Smart Voice

Manage your lights without getting up from the couch with **voice control** compatible with Alexa and Google Assistant, and the dedicated Govee Home app. The ability to personalize lighting effects, modes, brightness and sync with music makes any event more exciting. Create the perfect atmosphere with one voice command or a few clicks!

Smart Voice & App Control
