Full product description

Govee TV Backlight 3 Lite - backlighting your TV to a new level!

Govee TV Backlight 3 Lite RGBIC W is a smart TV **backlight** that adapts to the content on the screen, thanks to a **special fisheye camera**. The backlight has multiple modes, more than 16 million colors and easy installation and operation. Govee TV Backlight 3 Lite is a product that will make watching TV even more exciting and realistic.

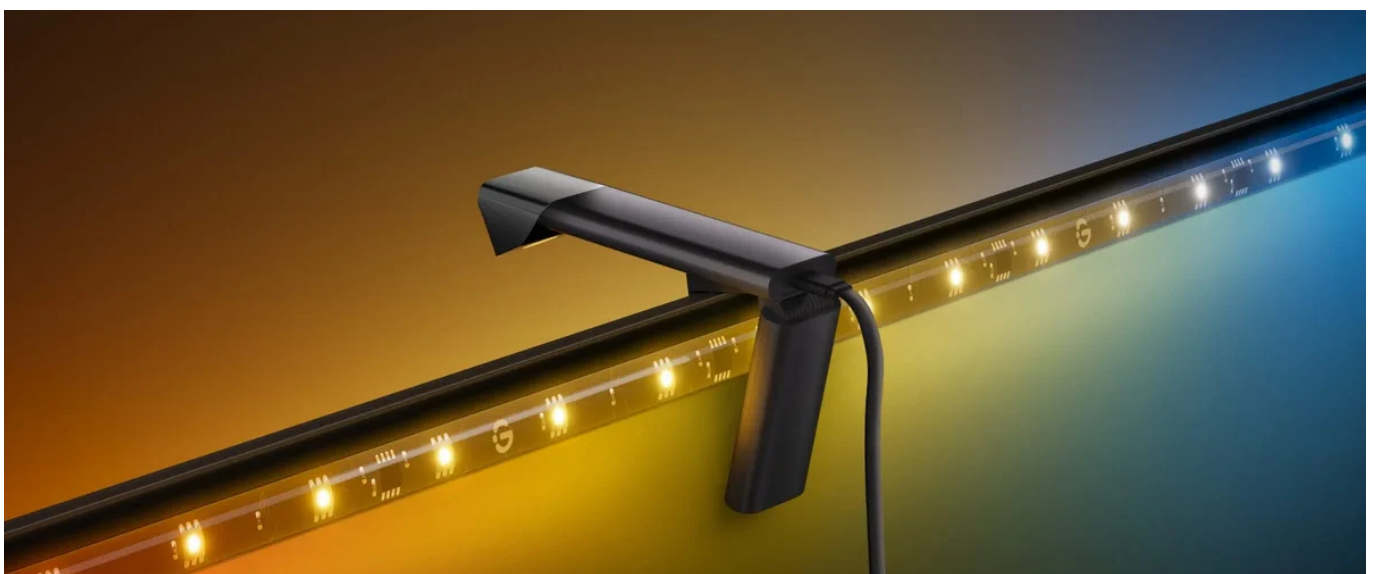

Immerse yourself in colors

With Govee TV Backlight 3 Lite, watching TV will be even more exciting and realistic. The colors on the screen spill over the wall behind the TV, creating an amazing visual effect. Govee TV Backlight 3 Lite is a smart TV backlight that adapts to the content on the screen, thanks to a special fisheye camera.

Easy installation and operation

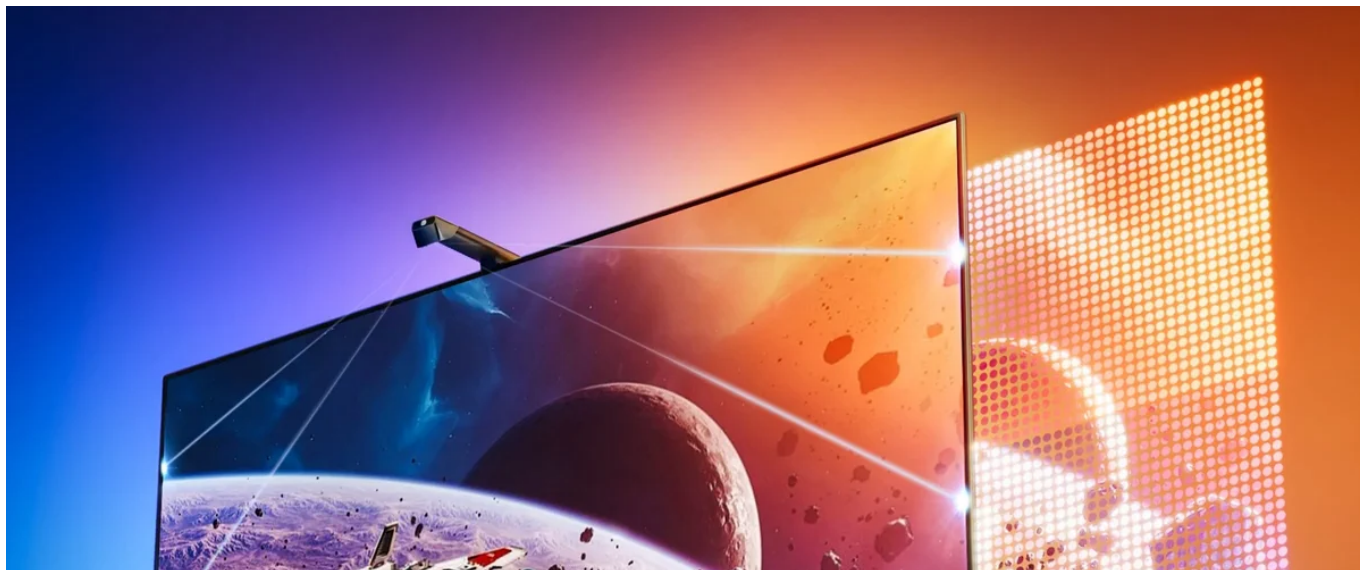

Connecting and setting up the TV backlight is easy and fast. The backlight will fit perfectly on any size and type of TV, even ultra-thin ones. All you need to do is mount the camera on top of the TV, stick the LED tape around the screen, connect the power supply and connect to the Govee Home app on your smartphone. The app will allow you to configure the backlighting according to your preferences, as well as control it remotely.

Advanced technology

The TV's backlighting is intelligent and extremely precise, responding to every change in color and brightness on the screen. The backlight uses a fisheye camera that detects the colors on the TV screen and sends them to an LED strip that illuminates the wall behind it. The backlight also

has a fisheye correction function that improves color accuracy. The lights automatically turn off when they detect a blank or static screen to effectively capture colors. With Govee's DreamView technology, you can add up to 7 slave devices to synchronize lighting effects with the Backlight 3 Lite TV backlight.

Infinite possibilities

The Govee TV backlight is versatile and versatile. It is suitable for different types of content, such as movies, games, music, sports and news. The backlight can create the right mood and atmosphere for any occasion, thanks to more than 16 million colors, RGBIC W technology and multiple modes. You can choose a scene mode to match the backlight to the genre of the movie or game, a music mode to synchronize the backlight with the rhythm and sound, a sports mode to increase excitement and tension, or a news mode to lend seriousness and professionalism.
