Price: **706.64 zł** gross / 574.50 zł net

Manufacturer: EXTRALINK

Referention number: DNXGKMKNRMMKQ

Information:

Extralink Nature Flow 52 Smart WiFi is a modern ceiling fan with built-in 18 W LED lighting and TUYA WiFi control. It combines a matte white housing with three solid wood blades, making it a good fit for a living room, bedroom or study. It offers 6 fan speed levels, Forward/Reverse mode for summer and winter use, and a 1/4/8 h timer. The 3CCT lighting lets you choose 3000K, 4500K or 6500K, and it can be controlled via the app or remote. The DC motor ensures smooth, energy-efficient operation.

Full product description

Ceiling fan with lighting and airflow control

Extralink Nature Flow 52 Smart WiFi combines a ceiling fan with an LED lamp. The unit has a matt white housing and three solid wood blades with a natural finish. The 52-inch diameter, or 132 cm, makes it suitable for a living room, bedroom, study or relaxation area.

Key benefits

- **18 W LED lighting 3CCT** – choice of colour temperature: 3000K, 4500K or 6500K.
- **TUYA WiFi control** – operate the fan and light using the app.
- **3 solid wood blades** – natural finish and harmony with the interior design.
- **6 speed levels** – adjust the airflow intensity.
- **Forward / Reverse mode** – change the rotation direction for summer and winter operation.
- **1 h / 4 h / 8 h timer** – automatic switch-off after the selected time.

Natural wood and matt white

The three blades made of solid wood retain the natural look and texture of the material. Combined with the matt white housing, they create a light form that suits modern interiors and nature-inspired arrangements. The 132 cm diameter supports air circulation in the room.

18 W 3CCT LED lighting

The integrated LED lighting has a power of 18 W and offers three colour temperatures. Warm white 3000K creates a cosy atmosphere, neutral white 4500K is ideal for everyday activities, and cool white 6500K provides clear lighting. The shade is made of acrylic.

TUYA WiFi app control

The fan supports the TUYA WiFi app, which allows you to manage the airflow speed, LED lighting, operating mode and device settings. A remote control is also included. This means the main functions are available both from a smartphone and from the remote.

Airflow and rotation direction adjustment

Six speed levels let you match the airflow intensity to your current needs. The Forward / Reverse function allows you to change the direction of rotation. In summer mode, air is directed downwards, while in winter mode the warm air collected under the ceiling is returned to the room.

DC motor and timer function

The fan is powered by a DC153×12 mm motor with an output of 35 W. DC technology supports smooth operation with reduced energy consumption. The timer allows you to set automatic switch-off after 1, 4 or 8 hours, making the unit easier to use while sleeping, resting and during everyday activities.

Specification

Parameter	Details
Model	Extralink Nature Flow 52 Smart WiFi
Type	Ceiling fan with LED
Size	52 inches / 132 cm diameter
Housing colour	Matt white
Blades	3 × solid wood
Blade finish	Natural wood
Shade	Acrylic
Light source	LED 18 W 3CCT
Colour temperature	3000K / 4500K / 6500K
Motor	DC153×12 mm
Motor power	35 W
Voltage	220 V / 50 Hz
Control	Remote control + TUYA WiFi app
Number of speeds	6
Rotation direction	Forward / Reverse
Timer	1 h / 4 h / 8 h
