Price: **149.00 zł** gross / 121.14 zł net

Manufacturer: EXTRALINK

Referention number: DNXGKMOOGRMMOM

Information:

A recycling bin with a capacity of approx. 100 l makes it easy to sort PET bottles, aluminium cans and returnable packaging in one place. Thanks to its dimensions of 41 × 33 × 70 cm, it is suitable for the kitchen, laundry room, pantry, garage or utility room. The flexible lid with a throw-in opening allows waste to be dropped in quickly without removing the lid, while the enclosed design helps maintain a neat appearance. The removable carry bag with handle makes it easy to transport the contents to a collection point, and the waterproof Oxford 600D fabric is easy to clean and suitable for washing. The bamboo frame provides stability and a natural look, while the foldable design makes storage easier.

Full product description

Sorting made tidy

A recycling bin with a capacity of approx. 100 l makes it easy to collect PET bottles, aluminium cans and returnable containers in one place. The dimensions of 41 × 33 × 70 cm mean it can be placed in the kitchen, utility room, pantry, garage or storeroom without the need to set out several smaller containers.

Cover with opening

The flexible cover with a throw-in opening allows bottles and cans to be dropped in quickly without removing the entire top section. The covered design reduces the visibility of the bin's contents and helps keep the sorting area looking neat at home or in the back room.

Carrying bag

Inside there is a removable transport bag with a handle. Once full, you can take out just the insert and carry the containers to the deposit machine, bin shelter or collection point. It is a practical solution when there is no need to move the whole bin.

Oxford 600D fabric

The bag is made of Oxford 600D fabric with water-resistant properties. The material can be wiped clean, and the bag can be washed when it needs freshening up after contact with bottles, cans or drink containers.

Bamboo frame

The bamboo frame gives the bin a neat shape and adds a natural accent to the interior. The foldable design makes it easy to store the container when not in use, and the black colour scheme suits kitchens, utility rooms, garages and storerooms.

Set contents

The set includes a recycling bin with a capacity of approx. 100 l, a flexible cover with a throw-in opening, a removable transport bag with a handle and a bamboo frame forming the structure. The set is used for sorting PET bottles, cans and returnable containers.
