Information:

Extralink ESP-300B is a lightweight and compact portable projector, ideal for home, office and outdoor use. It weighs around 850 g and fits easily into a backpack or suitcase, making it perfect for trips, meetings and presentations. It offers a native resolution of 1280 × 720 px, support for Full HD and 4K content, a 1500:1 contrast ratio and 200 ANSI brightness, delivering a clear image up to 130 inches. The built-in 3 W HiFi speaker allows convenient viewing without additional audio, while Bluetooth 4.1 and Wi-Fi 2,4/5 GHz make connectivity easy. 180° rotation, automatic keystone correction, manual focus and 50% zoom let you quickly adapt the projection to any space.

Full product description

Portable projection at home, in the office and outdoors

You can easily take the Extralink ESP-300B on a trip, to a family gathering or to a presentation at work. **Compact dimensions of 220 × 140 × 120 mm** make it easy to store, and a **weight of around 850 g** means you can conveniently pack the device into a backpack or suitcase. Thanks to its versatile use, the projector is ideal for film screenings, gaming, meetings and presenting content.

Przenośny projektor

Nasz projektor Extralink to idealny towarzysz podróży i pracy. Dzięki niewielkiej wadze zmieścisz go łatwo w plecaku czy walizce podróżnej, zapewniając sobie możliwość prezentacji gdziekolwiek zechcesz. Doskonały zarówno do użytku domowego, jak i biurowego – gwarantuje wyraziste obrazy i wygodę użytkowania.

Cinematic sound without extra equipment

The built-in **3 W HiFi speaker** lets you watch films, streams and play games without needing to connect an external audio system. When you want stronger or more personal sound, **Bluetooth 4.1** makes it easy to pair headphones or a wireless speaker. **Dual-band Wi-Fi 2.4/5 GHz** provides a convenient connection to compatible mobile devices and tablets.

Flexible positioning from the wall to the ceiling

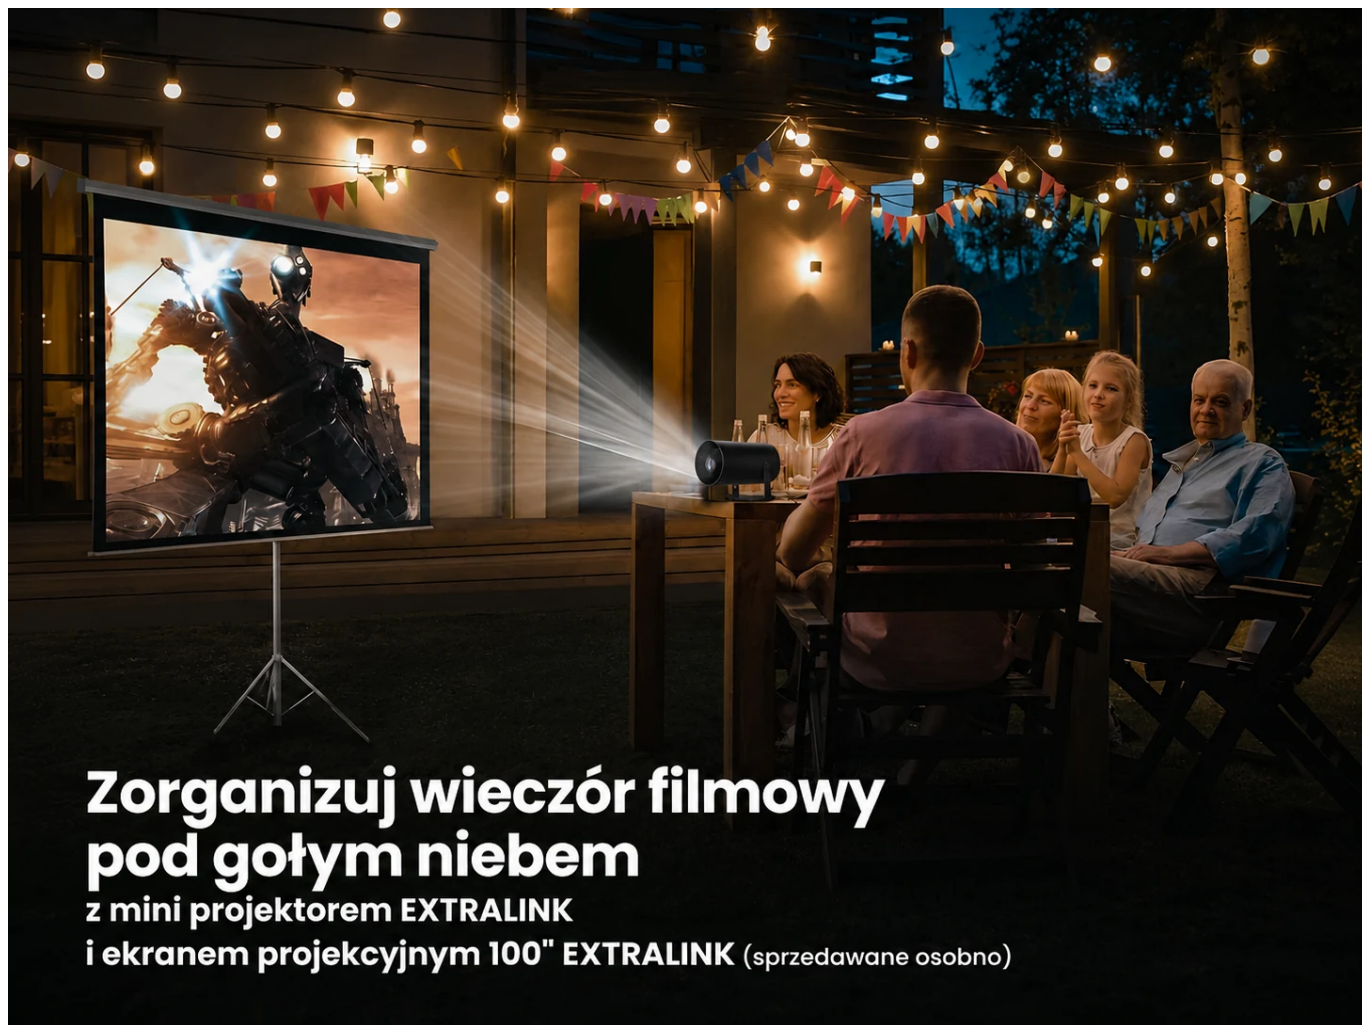

The adjustable design makes it easy to adapt the projection position to the conditions in a room or outdoors. **180° vertical rotation** lets you direct the projection onto a wall, floor or ceiling, and **automatic keystone correction** helps you quickly achieve the correct shape of the displayed image. **Manual focus adjustment** allows you to fine-tune sharpness during a screening or presentation.

**Nasz projektor jest wyposażony w unikalną funkcję
obracania się o 180 stopni w pionie co pozwala na
wyświetlanie obrazów od ściany do sufitu.**

Movie night at home or under the open sky

The ESP-300B lets you create a screening for family and friends both in the living room and during an outdoor gathering. **200 ANSI brightness** helps produce a clear projection in a suitably darkened environment, and a **screen size of up to 130 inches** provides a cinematic viewing scale. **25 dB noise level** reduces operating sounds, so you can focus on the film, series or sports broadcast.

Clear details and a projection size to suit your needs

The projector delivers detailed content display thanks to its **native resolution of 1280 x 720 pixels** and support for decoding Full HD and 4K content. **1500:1 contrast** helps maintain clarity in bright and dark scenes, which is ideal for films, games and sports broadcasts. **50% zoom** lets you change the projection size with the remote control without moving the device.
