Information:

The Extralink Home swivel chair is a comfortable and functional solution for the office and home. It offers seat height adjustment in the range 40-50 cm, making it easy to match to the user's height and desk height. The breathable mesh backrest with lumbar support, soft seat and armrests ensure comfort during work, study and online meetings. The swivel design and castors make it easy to move around freely, while the black-and-grey colour scheme with a chrome base suits a variety of interiors. The maximum load is 110 kg.

Full product description

Adjustable height

The Extralink Home swivel chair is equipped with a lever that allows the seat height to be adjusted from 40 to 50 cm. This makes it possible to adapt its position to the user's height and the desk height. The adjustment helps you adopt a comfortable position while working, studying and using a computer.

Breathable backrest

The backrest made of mesh material supports airflow while sitting. The contoured element in the lower section helps support the lumbar area, while the armrests allow for a comfortable position for the arms. The black upholstery of the seat creates a cohesive whole with the grey-and-black backrest.

Comfort while working

The soft seat and high backrest help maintain comfort while carrying out everyday tasks at the desk. The armrests support the arms, and the contoured backrest design adapts to the back. The chair is ideal for computer work, studying and online meetings.

Freedom of movement

The swivel design makes it easy to change position relative to the desk and nearby items. The five-star base is fitted with castors that make it easy to move the chair around the workstation. The chrome finish of the base emphasises its versatile style.

For office and home

The subdued black-and-grey colour scheme means the chair can be matched to both office spaces and a home workstation. Its compact design allows it to be placed by a computer desk, in a study or in a room intended for learning. The mesh backrest gives the whole piece a light form.

Dimensions and load capacity

The chair is 93 cm high, 52 cm wide and 52 cm deep. The seat measures 48 cm in width and 49 cm in depth, and its height can be adjusted from 40 to 50 cm. The maximum permissible load is 110 kg. The dimensions of the design make it easy to fit into a typical office workstation.
