Manufacturer: XIAOMI

Referention number: DNXGKNMNDRMMKJ

Information:

Xiaomi TV Stick HD (2nd Gen) is a compact media player that, when connected to an HDMI port, turns an ordinary television into a Smart TV. It offers smoother performance thanks to 38% higher CPU performance, picture quality with HDR10+ support, and better sound thanks to Dolby Audio™ and DTS:X. The Google TV™ system makes it easier to search for content and provides personalised recommendations, while pre-installed apps such as Netflix, Prime Video and YouTube let you start watching straight away. Dual-band Wi-Fi, Bluetooth 5.0, Google Assistant voice control and simple installation make it a convenient solution for home and on the go.

Full product description

Smart TV for your television

Xiaomi TV Stick HD (2nd Gen) is a compact media player for a television with an HDMI port. Once connected, it turns a regular screen into a device for watching films, series and web applications. Thanks to its small casing, it is also ideal where simple installation and easy portability matter.

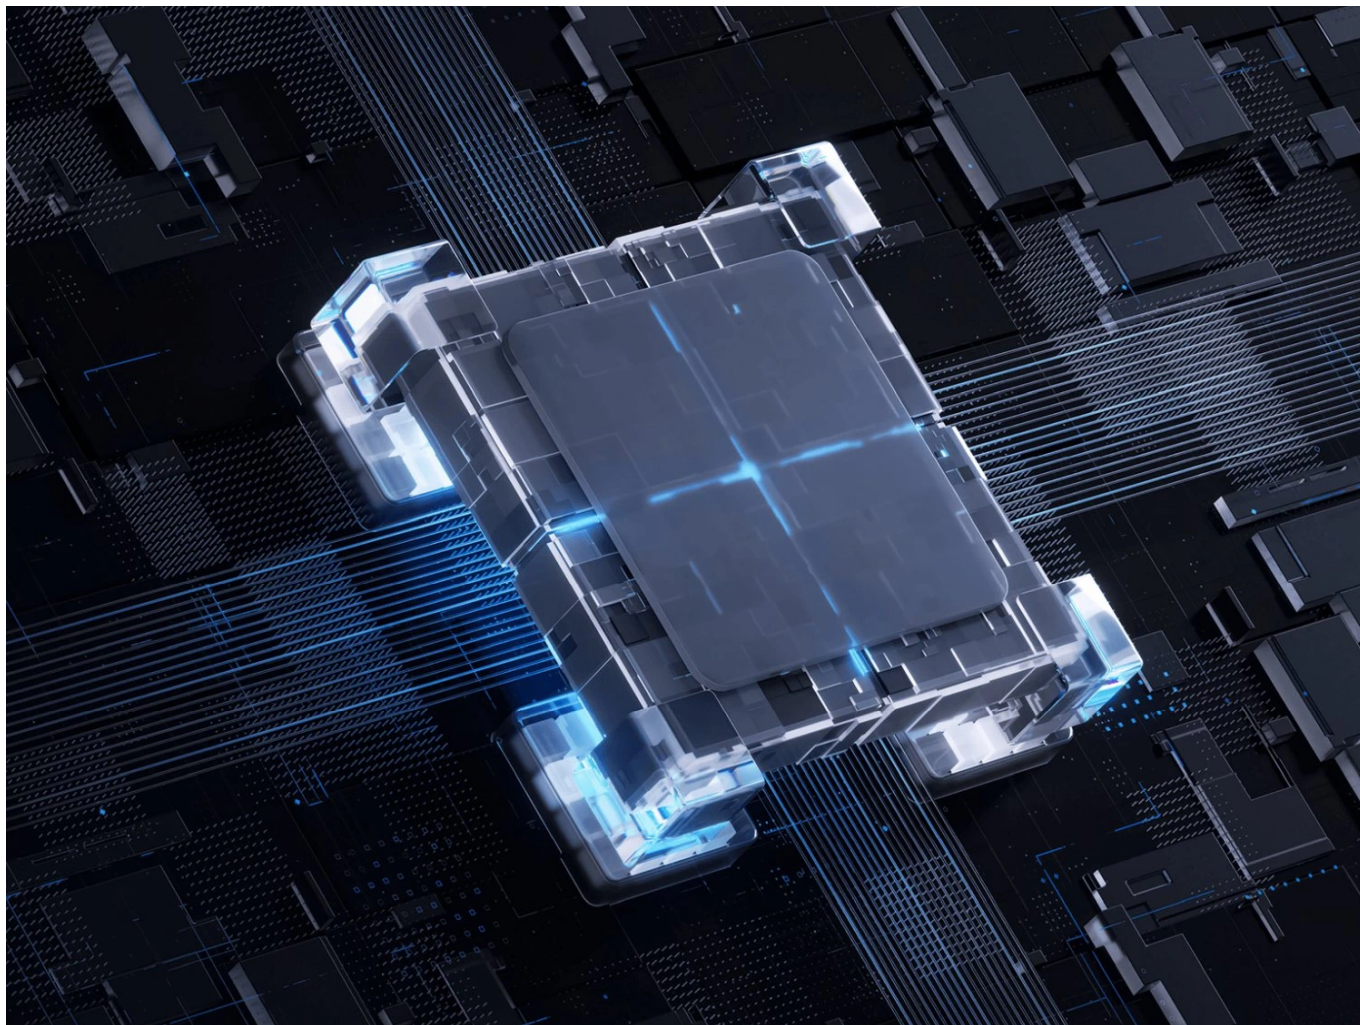

Key benefits

- **HDMI connection** — quick activation of smart functions on most televisions and monitors.
- **CPU performance +38%** — smoother app switching and more efficient menu operation.
- **HDR10+** — clearer details in bright and dark scenes while watching films.
- **Dolby Audio™ and DTS:X** — richer sound with better separation of audio layers.
- **Google TV™** — more convenient content search and recommendations tailored to the user.
- **Dual-band Wi-Fi** — more stable online playback in different network conditions.

Smoother everyday performance

The device uses a new-generation hardware platform that ensures smoother interface operation and faster content launch. Compared with the Mi TV Stick, it offers **38% higher processor performance**, which translates into less lag when using apps. This is especially important when you want to get back to watching quickly without waiting for the system to respond.

Picture with better detail separation

HDR10+ support improves the rendering of highlights and shadows, making film scenes clearer. Bright elements do not blend into the background, and dark areas retain more detail. You will especially appreciate this solution with series, action films and content available in high dynamic range.

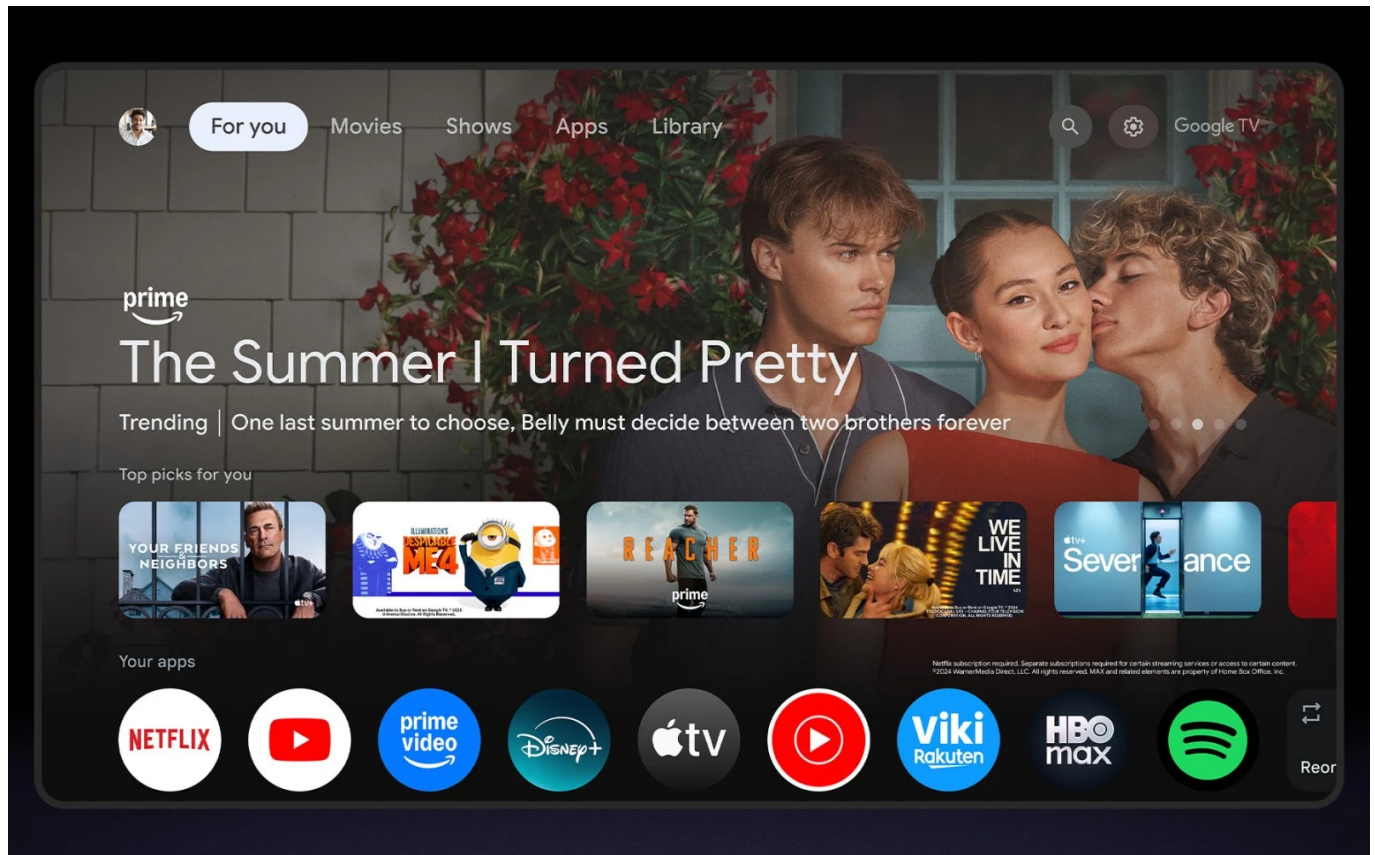

Clearer sound in films

Dolby Audio™ and **DTS:X** provide more detailed decoding of the soundtrack. In practice, this means better dialogue intelligibility, fuller effects and a more organised audio stage. If you use a television or a compatible sound system, you get a more engaging viewing experience.

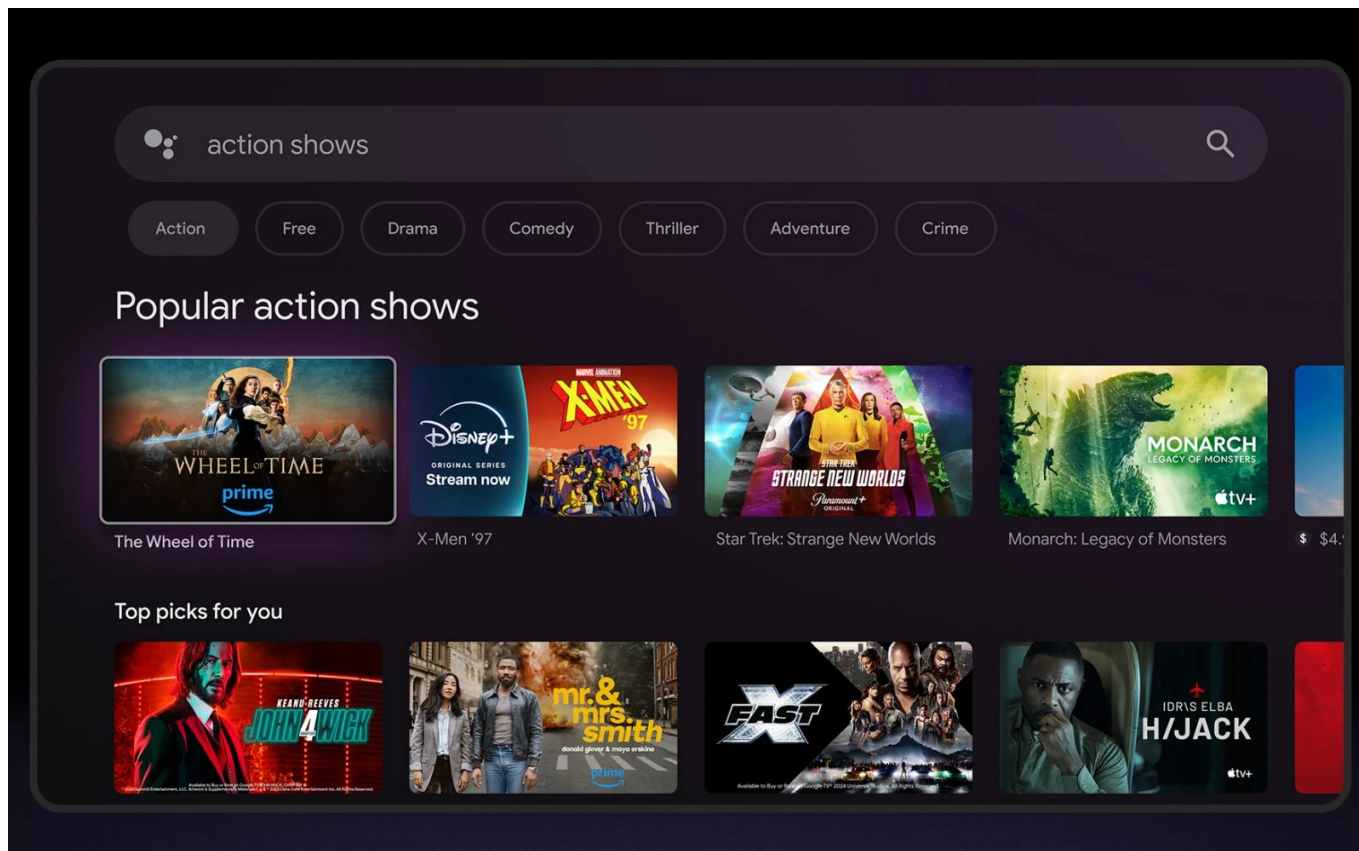

Google TV makes content selection easier

Google TV™ organises films, series and apps in one place, so you do not waste time searching for content across multiple services. The system also offers recommendations tailored to the user profile and search across thousands of apps and hundreds of channels. This means you can get to the content you want to watch faster, without going through unnecessary menus.

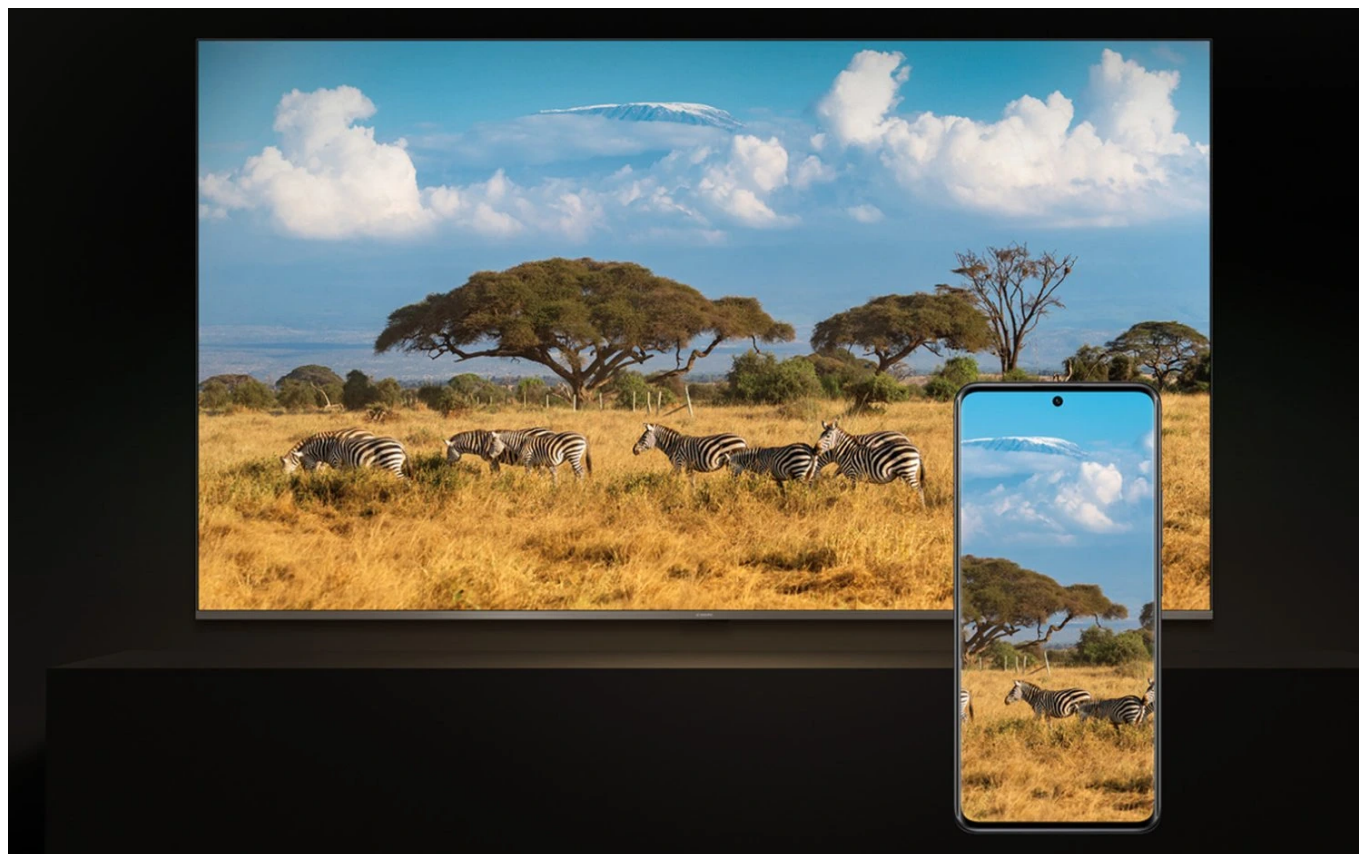

Voice and phone control

The remote supports **Google Assistant**, so you can search for films, launch apps, play music and control the television without typing. In addition, the device supports casting from a phone or tablet, making it easy to show photos, videos and app content on a large screen. This setup reduces operation to a few commands and one button.

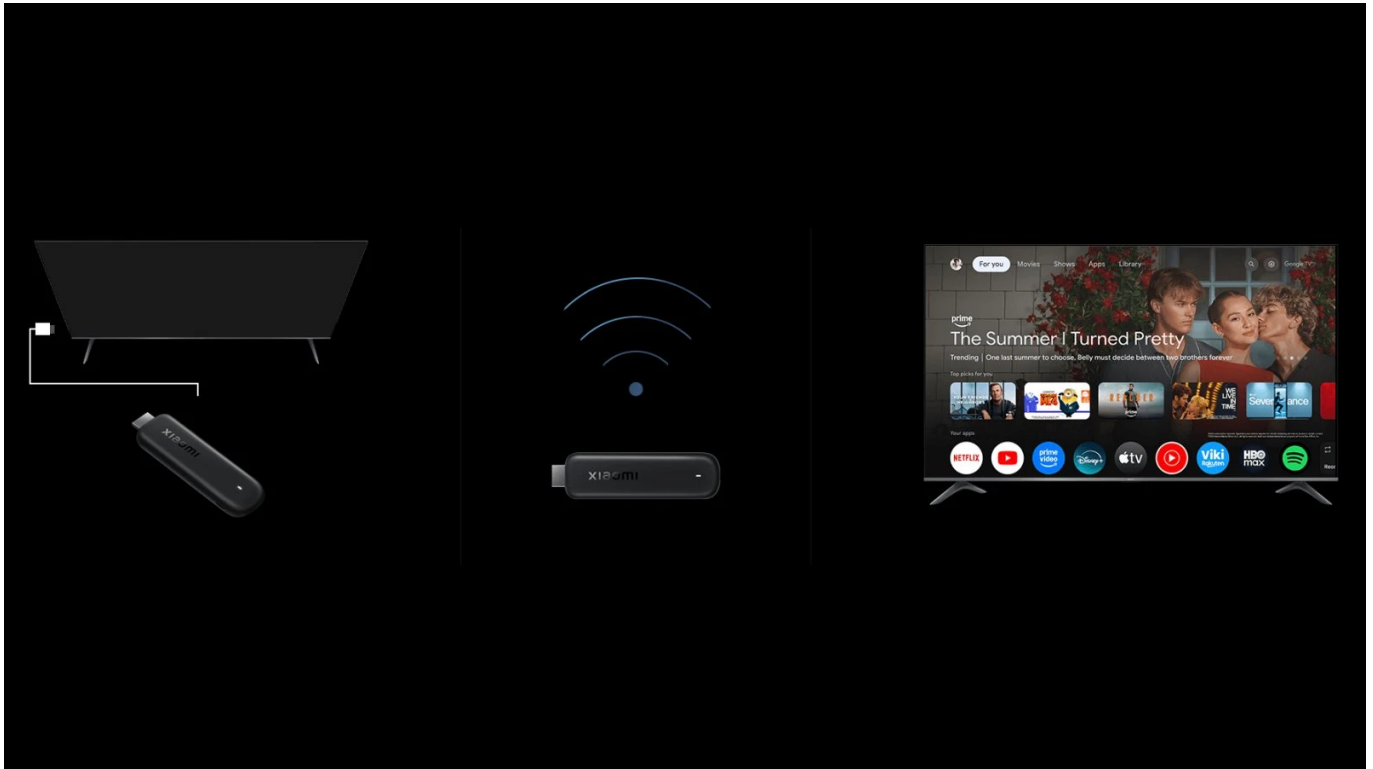

Stable connection and a convenient remote

Dual-band Wi-Fi supports 2.4 GHz and 5 GHz bands, making it easier to match the connection to home network conditions. The remote works via **Bluetooth** and infrared, so control remains convenient even from different viewing angles. The combination of shortcuts, voice control and a simple button layout makes everyday use easier without unnecessary steps.

Simple installation in three steps

Setup is limited to connecting the device to the television, joining the Wi-Fi network and starting to watch. This process is ideal when you want to quickly enable smart functions without complicated installation. The **compact design** also makes it easy to pack the device and move it to another television, for example in the bedroom or when travelling.

Technical specifications

- **Output resolution:** 720i/p, 1080i/p, up to 1080p at 60Hz
- **Operating system:** Google TV™
- **Pre-installed apps:** Netflix, Amazon Prime Video, YouTube
- **Processor (CPU):** Quad-core Cortex-A55
- **Graphics card (GPU):** Mali-G31 MP2
- **RAM:** 1GB DDR4
- **Internal memory:** 8GB
- **Dimensions:** 107.4 mm (length) x 30 mm (width) x 14 mm (thickness)
- **Weight:** 44 g
- **Colour:** Black
- **Video decoders:** AV1, VP9, H.265, H.264, MPEG-4, MPEG-2, MPEG-1, VC-1, real-8, real-9, real-10
- **Video formats:** RM, RMVB, FLV, MOV, VOB, AVI, MKV, TS, MP4, HDR
- **Audio decoders:** DTS:X, DTS HD
- **Audio formats:** MP3, AAC, FLAC, OGG
- **Image decoders:** JPG, BMP, GIF, PNG
- **Wireless connectivity:** Wi-Fi (2.4GHz / 5GHz), Bluetooth 5.0
- **Ports:** 1x HDMI, 1x Micro USB
- **Package contents:** Xiaomi TV Stick HD (2nd Gen), remote control, user manual, HDMI extender, USB power cable (the set does not include a mains adapter)
