Full product description

LED light strips from Govee

Enrich any space around your home with **LED light strips from Govee**. Customize the colors and effects with voice control or the **Govee Home app** for perfect personalization. **The Govee H618C RGBIC light strip** is a unique lighting solution that can add a captivating ambiance to your living space. This versatile light strip can be easily installed in any interior, including bedrooms, living rooms, kitchens and offices.

Key features of the Govee H618C

- RGBIC technology: customize multiple colors on a single bar
- Hands-free voice control: Alexa compatibility
- Smart control via app: Change colors, brightness and more with the Govee Home App
- 11 music modes: Your lights will respond to your favorite music
- 64 preset scene modes: Inspired by nature, vacations and more

Voice control over Wi-Fi

With 16 million vibrant colors and numerous lighting modes, the **Govee Light Strip H618C** provides an unparalleled level of personalization. You can easily switch between different colors, brightness levels and lighting effects using the intuitive **mobile app or voice commands** via Alexa or Google Assistant.

Application with a multitude of configuration options

Use the **Govee Home App** and control your lighting remotely with a stable Wi-Fi connection. Access more than 16 million colors, brightness adjustments, music modes and other options.

Segmented RGBIC color control

Unlike traditional RGB LED lights, **Govee H618C LED strips use innovative RGBIC technology**. With integrated IC (Independent Control) circuitry, multiple colors can be simultaneously displayed on the LED strip.

Music synchronization mode

With the **Music Sync** mode in the **Govee Home App**, you can really bring your lighting to life. **Your RGBIC LED strips respond in real time** to your favorite soundtracks with a built-in, high-sensitivity microphone. You can even customize the effects for a truly immersive experience.

Do it your way

With the DIY mode, your lights match any mood or atmosphere. You can choose from different colors, effects, speeds and directions for complete personalization. In addition, you can share your creations and save those made by other users in the Govee community.

Light studio

For additional creativity, you can access **Light Studio in the Govee Home app**. This feature is updated regularly, so you can always see if you can find exciting new light effects and customization options. You can even share your effects or save effects created by Govee community members.
