Price: **176.38 zł** gross / 143.40 zł net

Manufacturer: EXTRALINK

Referention number: DNXXGKNNFRMMMO

Information:

Powerlink CleanGrill 360 is an electric brush for quick and convenient grill cleaning without manual scrubbing. The rotating stainless steel head operates at 1100 rpm and effectively removes burnt-on grease, charred food residue and old deposits without damaging metal grates. Thanks to the 2000 mAh battery, the device works wirelessly, and USB-C charging provides great convenience. The 4-in-1 model is also suitable for removing rust and cleaning pots, pans, ventilation grilles and cooker hoods. The set includes protective gloves, a spanner and a USB-C cable.

Full product description

Quick grill cleaning without effort

The electric grill cleaning brush **Powerlink CleanGrill 360** makes it easy to remove dirt after grilling in the garden, on the patio and in the home kitchen. The device eliminates the need for manual scrubbing, reducing the time needed to maintain your equipment. Its design effectively tackles burnt-on grease, charred food residue and dried deposits.

Removing stubborn dirt at 1,100 rpm

The **copper-core** motor generates a stable speed of **1,100 revolutions per minute**. The rotating head made of **stainless steel** ensures high effectiveness during scrubbing, resulting in quick cleaning of the surface. This solution makes it possible to remove even multi-layered, old scorch marks without damaging the metal structure of the grates.

Portable operation with a 2000 mAh battery

The built-in **2000 mAh** battery guarantees complete cordless use, making it easier to manoeuvre around a hot grill. The integrated **USB-C** port allows the brush to be charged using standard phone chargers or power banks. Built-in **LEDs** continuously indicate the current battery level, preventing an unexpected interruption in use.

Versatile use at home and in the garden

The device offers **4-in-1** functionality, proving useful for a variety of cleaning tasks. In addition to cleaning cast-iron grates, the brush removes **surface rust** from metal components. The tool also cleans burnt-on bottoms of pots and pans, and degreases steel ventilation grilles and kitchen hoods.

Complete kit for immediate use

The set includes all the items needed for maintenance and safe use of the device. The package contains an electric brush, a rotating wire head and a USB-C power cable. The manufacturer also includes **protective gloves** to protect your hands and a special wrench to make replacing the working parts easier.
