Price: **379.98 zł** gross / 308.93 zł net

Manufacturer: RANVOO

Referention number: DNXGKNPQLRMNLQ

Information:

RANVOO PQ5 AirJet Pure is a modern toothbrush that combines thorough cleaning with gentle gum care. AirJet Pure technology uses a stream of air and microbubbles to effectively break down plaque, including along the gum line, between the teeth and in hard-to-reach areas, without aggressive scrubbing. The lightweight, slim design sits comfortably in the hand, and the elegant finish suits any bathroom. The magnetic wall mount also serves for charging, while the full-size case makes travelling easier. The head, with antibacterial, fluoride-infused and colour-changing bristles, supports hygiene and reminds you when it is time to replace the brush head.

Full product description

The era of everyday oral care

RANVOO PQ5 AirJet Pure is a toothbrush designed for people who want to clean their teeth thoroughly, but without aggressive scrubbing or strong vibrations. Air-powered technology combines effective plaque removal with gentler gum care, making daily brushing more comfortable. The slim design, lightweight body and elegant finish make the toothbrush look great in the bathroom and sit comfortably in the hand.

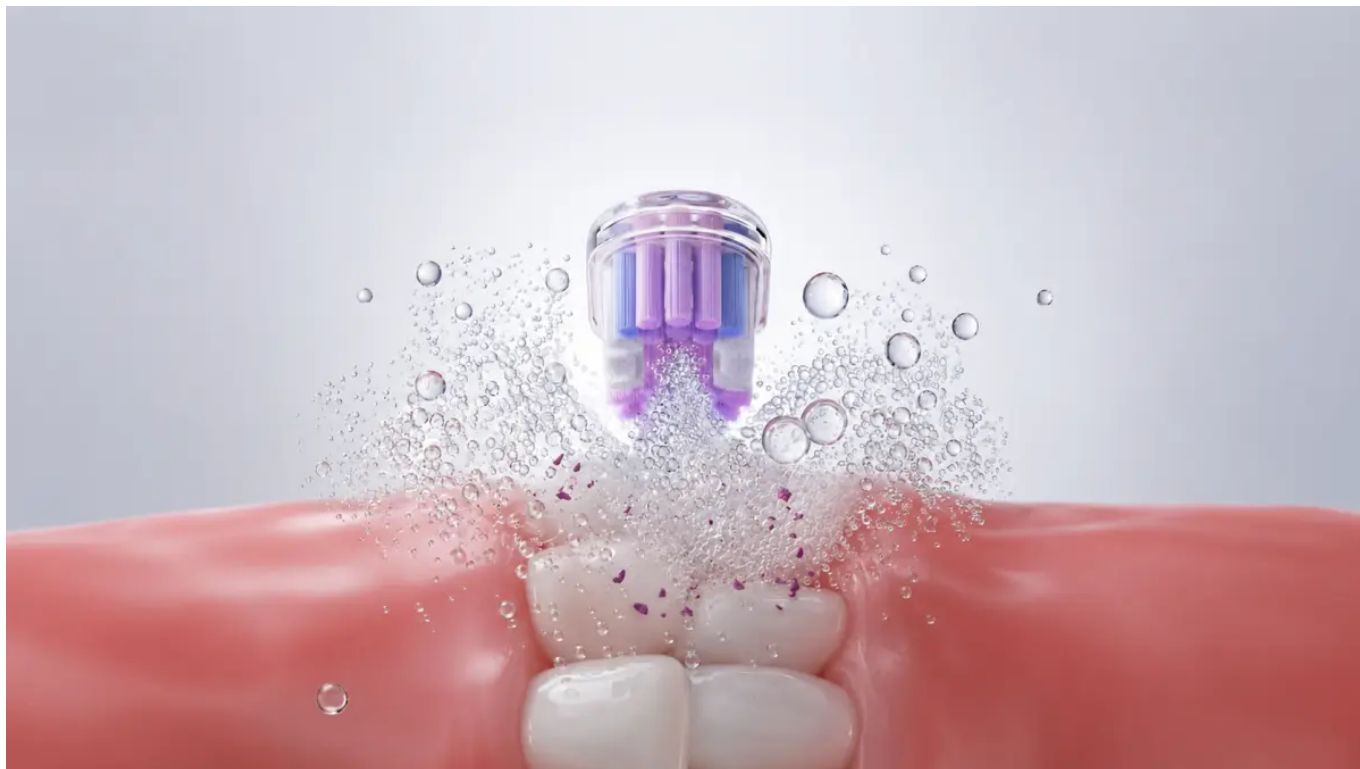

AirJet Pure and microbubbles

At the heart of the RANVOO PQ5 is AirJet Pure technology, which uses an air stream and microbubbles to break down plaque. The bubbles work where bristles alone have limited reach — along the gum line, in interdental spaces and in hard-to-reach areas. As a result, the toothbrush helps remove plaque more precisely while reducing the intense friction typical of traditional brushing.

Gentle on the gums

RANVOO PQ5 AirJet Pure was created as an alternative to classic brushing based mainly on mechanical friction. Microbubbles lift and break down plaque, helping clean teeth without vigorous scrubbing. This solution is especially suitable for people who expect thorough cleaning but want gentler contact with the gums and enamel.

For the bathroom and travel

RANVOO PQ5 AirJet Pure works well both at home and away. The magnetic wall mount serves as both storage and charging, helping keep the handle drier and the countertop tidy. The full-size travel case holds the entire toothbrush together with the head, so you can easily take it to work, on a trip or to the beauty salon. In addition, the head features antibacterial bristles, fluoride-infused bristles and colour-changing bristles that remind you when it is time to replace the head.

Intelligent cleaning

The toothbrush uses the Bubble+ Smart Core system, which supports the AirJet technology and is responsible for a more comfortable brushing experience. The design includes an AirJet nozzle, micro air flow, a bubble penetration system and a fluid motor that helps break down plaque at the source. Pressure-sensitive touch control helps maintain a smooth, sealed body surface, reducing places where plaque could build up.
