Information:

The electric Airbrush Pen set is a creative spray-painting toy that turns ordinary markers into a tool for creating fluffy and gradient designs. It is easy to use, allowing children to experiment with colours independently, develop their imagination, and improve hand-eye coordination. The set includes colourful markers, stencils with plant motifs, letters and shapes, and a heart-shaped base for storing the device. It is an ideal choice for making cards, decorations and ornaments, supporting the development of manual skills and creativity.

Full product description

Electric creative painting set

Airbrush Pen introduces children to the world of spray painting. Thanks to a special gun, ordinary felt-tip pens are transformed into a tool for creating fluffy and gradient patterns, allowing children to develop their imagination and discover their own creativity.

Easy to use for the youngest children

The device is simple to use – just insert a felt-tip pen into the gun and press the button. The intuitive design supports independent play, encourages experimenting with colours and shapes, and develops hand-eye coordination.

Rich set of accessories

The set includes colourful felt-tip pens, stencils with plant, letter and shape motifs, and a heart-shaped base for storing the device. The elements allow children to create repeatable designs while also supporting the development of manual skills.

Creativity development and decorative effects

Playing with the Airbrush Pen develops spatial imagination and colour sensitivity. Children can prepare their own cards, decorations and ornaments, enjoying the satisfaction of self-made projects that can inspire further creative activities.
