Information:

Painting Designer is a creative set for children aged 8 and over, allowing them to easily create striking geometric patterns and colourful spirals. The set includes large and small templates, 3 coloured pens, drawing paper and modelling clay for fixing the elements in place, so the fun can begin straight after opening. The set develops imagination, manual skills and concentration, and helps children learn the basics of geometry and symmetry. Durable, transparent and safe materials make it a great gift idea and an inspiration for creating their own artwork.

Full product description

Creative fun for children

The Painting Designer set introduces children to the world of geometric patterns and colourful spirals. Thanks to the variety of templates, children can create intricate designs in a simple and enjoyable way, developing their imagination and manual skills.

Complete accessory set

The set includes two large rings, many smaller gears and unusual templates, three coloured pens, drawing paper and modelling clay for securing the elements. Everything is ready to use straight out of the box.

Learning through play

Creating patterns allows children not only to draw, but also to learn the basics of mathematics and geometry by observing symmetry, angles and repeating forms. Spiral shapes support concentration and develop analytical skills.

Practical and safe materials

The elements are made of durable, transparent plastic, safe for children. The pens have an ergonomic shape, and the paper and modelling clay allow experimentation without the risk of stains or damage to surfaces.

Ideal gift and artistic inspiration

The Painting Designer set is an option for children aged 8 and over. It encourages creativity, stimulates imagination and allows them to create their own unique works of art, which can be displayed or given to loved ones.
