Information:

The cordless sculpting set with a pottery wheel is a creative activity for children aged 8 and over, allowing them to make their own cups, bowls and jugs. The wheel has two speed settings, making it easy to adjust the pace to the child's abilities. The set includes 800 g of clay, 6 colours of paint, brushes, sculpting tools, a palette and a wire for cutting the clay. The set develops manual skills, patience, precision and imagination, and the CE and EN71 certificates confirm safe use.

Full product description

Creative fun from the very first use

A pottery set with a potter's wheel allows a child to become fully engaged in creating their own vessels. Thanks to the practical wheel with two rotation speeds, the young artist can adjust the pace of work to their abilities, which supports comfortable and safe play.

Mobility and convenience

Cordless operation allows the set to be used anywhere. Battery-powered, it does not require cables, so the child can experiment freely, and parents do not have to worry about mess on the table or floor.

Comprehensive equipment

The set includes 800 grams of clay and six paint colours for finishing every project. The child also has brushes, sculpting tools, a paint-mixing palette and a special wire for detaching the clay from the wheel, allowing the full potential of the set to be used.

Development of manual skills and creativity

The potter's wheel develops a child's manual and artistic skills, stimulates creative thinking and a sense of aesthetics. Creating their own jugs, cups or bowls is not only fun, but also a lesson in patience, precision and spatial imagination.

Safety and compliance with standards

The product has CE and EN71 certifications, is intended for children over 8 years old, and its dimensions and weight have been adapted to the needs of younger users. The set is not suitable for children under 36 months and is a complete option for young creators who want to experiment with clay and paints in a safe way.
