Price: **1,579.98 zł** gross / 1,284.54 zł net

Manufacturer: POTENSIC

Reference number: DNXGKOKJDRMMGJ

Information:

ATOM 3 is a lightweight drone weighing under 249 g, ideal for unrestricted flying without much paperwork. It offers stable HD transmission up to 16 km, a built-in 5.5" FHD 900-nit screen, and intelligent features such as AI Tracking 2.0, QuickShots and automatic return-to-home. The camera with a 1/1.3" sensor records in 4K/60 fps and takes 50 MP photos, while AI Night Mode improves the quality of night shots. The drone provides 40–50 minutes of flight time, fast charging and convenient media management in the Potensic Eve app.

Product features

Type	Standard Remote Kit

Full product description

Freedom of flight and lightness

ATOM 3 weighs less than 249 g, which allows it to be used freely in most countries and regions without the need for training or certification. It enables you to capture every moment anywhere and at any time, offering complete flexibility in creating aerial video and photography content.

Connectivity and smart features

HD video transmission over a distance of up to 16 km at 10 Mbps and a tri-band transmission system ensure a stable image and low latency. The built-in 5.5" FHD screen with 900 nits brightness allows viewing in full sunlight. ATOM 3 supports AI Tracking 2.0, QuickShots (Boomerang, Rocket), Waypoint, Dolly Zoom, Spin Ascend, Spiral and Drift. The propeller guard and AR RTH system help keep flights safe.

Professional image quality

The 1/1.3-inch sensor enables 4K/60 fps video recording and 50 MP photos. AI Night Mode delivers clear images in low light, while city neon lights are rendered without overexposure, producing realistic and highly detailed night shots.

Comfort and media management

The ability to instantly switch between landscape and portrait shots, together with the Potensic Eve app, makes operation, media management and quick content sharing easier. Browsing albums, playing flight recordings and categorising SD files makes it quick to find the materials you need.

Performance and power

ATOM 3 has a battery that provides 40–50 minutes of flight. The parallel charging station supports three batteries at once, and standard batteries charge in 90 minutes, long-range batteries in 135 minutes. The Power Accumulation function consolidates remaining energy, maximising the drone’s readiness for flight.

Zoom and portrait mode

The Med-Tele mode (48 mm) enables 4x 4K video zoom, capturing detailed portraits and landscapes without loss of quality. The intelligent portrait mode automatically optimises lighting and skin tones, ensuring vivid and natural shots of people and nature.

Box contents

- 1 × ATOM 3 drone
- 1 × Remote controller
- 1 × Gimbal and propeller guard
- 1 × Intelligent battery
- 1 × USB-C cable
- 1 × USB Lightning cable
- 1 × Type C-C charging cable
- 4 × Spare propellers (2 pairs)

- 1 × Controller strap
- 8 × Spare screws
- 1 × Screwdriver
- 1 × Quick start guide

Technical specification

Parameter	Details
Weight	<249 g
Sensor	1/1.3 inch
Video resolution	4K/60 fps
Photo resolution	50 MP
Night mode	AI Night Mode
Med-Tele mode	48 mm, up to 4x 4K video zoom
Slow motion	7x
Battery	6200 mAh (standard), flight time 40–50 min
Fast charging	up to 65 W, standard battery 90 min, long-range 135 min
Video transmission	HD 1080p/60 fps, 10 Mbps, range up to 16 km
Transmission system	2.4 GHz, 5.2 GHz, 5.8 GHz (tri-band)
GNSS start	quick start, reducing connection time by 50%
Smart features	AI Tracking 2.0, QuickShots (Boomerang, Rocket), Waypoint, Dolly Zoom, Spin Ascend, Spiral, Drift
Propeller guard	full, enhanced protection
RTH system	AR RTH with visualisation of points and flight path
Photo mode	landscape and portrait
App	Potensic Eve, file management, flight recording playback, albums, online preview, video bookmarking
