Full product description

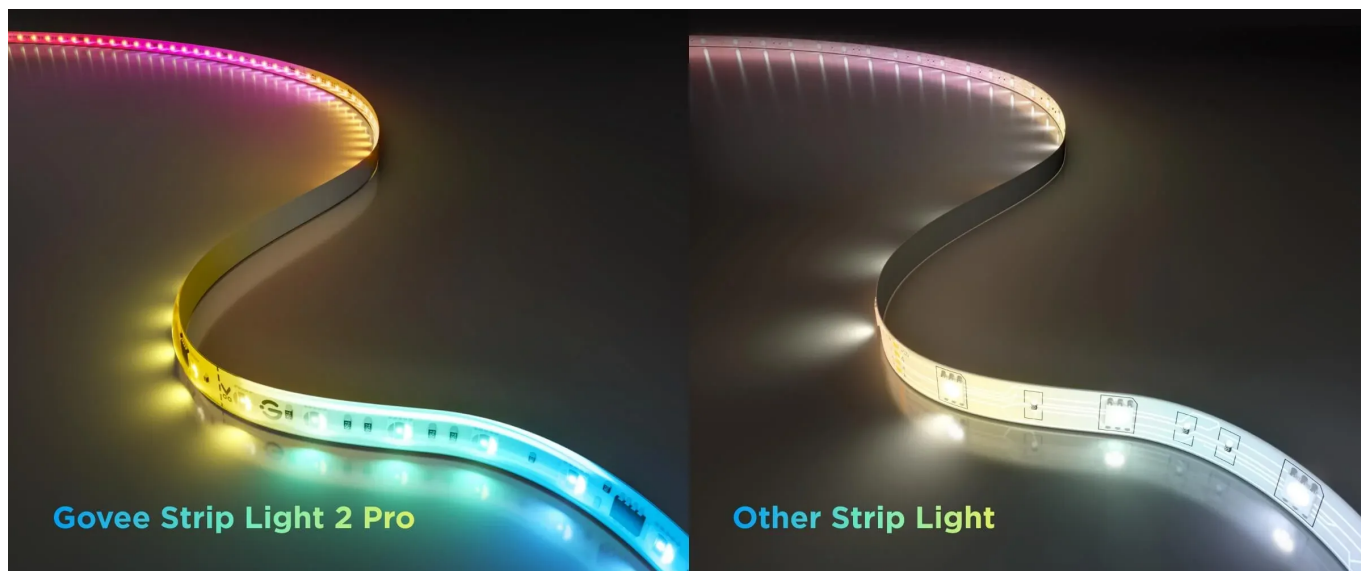

Illuminate your interior with the utmost precision with the Govee H61F5 Strip Light 2 Pro.

This smart light strip offers 16 million colors that you can customize to create a unique atmosphere in any room. Using RGBIC technology, the LED strip provides smooth color transitions and intense lighting effects that will delight any user. With the help of the Govee Home app, you can easily customize the lighting to suit your needs, controlling the light from your phone or using voice assistants such as Alexa and Google Assistant.

Fully customizable RGBIC

Thanks to **RGBIC technology**, the light strip offers a full range of colors and the ability to customize each segment of the LED strip with different colors to create unique lighting effects. You can choose from **16 million colors** that will blend perfectly with your interior. Control the lighting with the Govee Home app or voice assistants to make dynamic and smooth transitions between colors in real time.

Synchronization with music

The built-in microphone allows the lighting effects to be synchronized with the music, creating a unique atmosphere at any party or gaming area. The lights respond to sounds, adapting to the rhythm of the music, making the bar ideal for dynamic and creative interior designs.

Matter compatibility and comprehensive control

The Govee H61F5 Strip Light 2 Pro supports Matter, which provides seamless integration with other smart devices in your home. This allows you to easily control the Strip Light with any smart home ecosystem. **Wi-Fi and Bluetooth** make it easy to connect to an app, and voice assistants like **Alexa and Google Assistant** make controlling the light even easier.
