Information:

Xiaomi Mijia Electric Shaver Pro Portable is a compact electric shaver for men, designed for comfortable shaving of the face and neck at home and while travelling. Three movable heads adapt well to the contours of the skin, ensuring efficient and comfortable shaving without excessive pressure. The smooth, skin-friendly design increases ease of use, and the colour display makes it easy to monitor the device's operation. The shaver offers up to 90 days of battery life, making it ideal for mobile use. The IPX8 rating allows it to be washed under water, making cleaning and daily maintenance easier.

Full product description

Xiaomi Mijia Electric Shaver Pro Portable for everyday grooming

Xiaomi Mijia Electric Shaver Pro Portable is an electric men's shaver designed for comfortable shaving of the face and neck. Three shaving heads help it adapt to the contours of the skin, and the compact design means the device works well both in the home bathroom and when travelling.

Three heads and comfortable movement across the skin

The shaving system based on three heads enables efficient removal of stubble from different areas of the face. The multi-directional movable design helps the shaver better follow the lines of the cheeks, chin and neck, contributing to a more comfortable shave without the need to press the device firmly against the skin.

Mesh supporting stubble capture

The shaving design has been prepared to help capture hairs as the device is moved across the face. As a result, the shaver works well for regular grooming, when a quick refresh before work, a meeting or a journey matters.

Colour display with clear information

The large, dynamic colour display makes it easier to monitor the device and quickly check the most important information during use. It is a practical solution for everyday grooming, as the user can conveniently observe the shaver's status without interrupting the morning routine.

Smooth skin-friendly coating

The housing and working elements have been designed with comfortable contact with the skin in mind. The smooth coating helps reduce unpleasant friction, and the ergonomic shape means the shaver can be held securely in the hand while shaving the face, neck and jawline.

Up to 90 days of battery life

The long battery life of up to 90 days makes the shaver well suited to mobile use. It can be taken in a bag, wash bag or cabin luggage and used during shorter and longer trips without having to reach for the charger often.

Practical travel-friendly form

The compact design makes it easy to store the shaver in the bathroom, a drawer or a travel case. The device does not take up much space, so it is ideal for people who want quick-shave equipment close at hand at home, in a hotel, in the office or after training.

Washable under water and IPX8 rating

The Xiaomi Mijia Electric Shaver Pro Portable has an IPX8 protection rating, so it can be washed under water after shaving. This solution helps quickly remove stubble residue from the heads and keep the device clean without complicated maintenance.

Specification

The key features of the Xiaomi Mijia Electric Shaver Pro Portable include a three-head design, a colour display, long battery life and the ability to wash the device under water.
