Information:

Xiaomi Mijia Electric Shaver Pro Portable is a compact electric men's shaver for the daily care of the face and neck. The three movable heads adapt well to the contours of the cheeks, beard and jawline, ensuring comfortable and efficient shaving. The smooth, skin-friendly design increases user comfort, while the colour display makes it easy to monitor the device's operation. The shaver offers up to 90 days of battery life, making it ideal for use at home and while travelling. The IPX8 rating allows it to be washed under water, making quick cleaning and hygiene maintenance easier.

Full product description

Xiaomi Mijia Electric Shaver Pro Portable for everyday grooming

Xiaomi Mijia Electric Shaver Pro Portable is an electric men's shaver designed for comfortable shaving of the face and neck. Three shaving heads help adapt to the contours of the skin, and the compact design means the device works well both in the home bathroom and when travelling.

Three heads and comfortable movement across the skin

The shaving system based on three heads enables efficient removal of stubble from different areas of the face. The multi-directional moving design helps the shaver better follow the lines of the cheeks, chin and neck, contributing to a more comfortable shave without the need to press the device firmly against the skin.

Mesh supporting stubble capture

The shaving design has been prepared to help capture hairs as the device is moved across the face. As a result, the shaver is well suited to regular grooming, when a quick refresh before work, a meeting or a journey matters.

Colour display with clear information

The large, dynamic colour display makes it easy to monitor the device's operation and quickly check the most important information during use. It is a practical solution for everyday grooming, as the user can conveniently observe the shaver's status without interrupting the morning routine.

Skin-friendly smooth coating

The housing and working elements have been designed for comfortable contact with the skin. The smooth coating helps reduce unpleasant friction, and the ergonomic shape means the shaver can be held securely in the hand while shaving the face, neck and jawline.

Up to 90 days of battery life

The long battery life of up to 90 days makes the shaver well suited to mobile use. It can be taken in a bag, wash bag or cabin luggage and used during shorter and longer trips without having to reach for the charger often.

Practical travel-friendly form

The compact design makes it easy to store the shaver in the bathroom, a drawer or a travel case. The device does not take up much space, so it is ideal for people who want quick-shave equipment close at hand at home, in a hotel, in the office or after training.

Washable under water and IPX8 rating

The Xiaomi Mijia Electric Shaver Pro Portable has an IPX8 protection rating, so it can be washed under water after shaving. This solution helps quickly remove stubble residue from the heads and keep the device clean without complicated maintenance.

Specifications
