Manufacturer: XIAOMI

Referention number: DNXXGKONKFRMMKQ

Information:

Xiaomi Smart Band 10 Pro NFC is a lightweight and slim sports and health band with an aluminium frame and curved 2.5D glass, making it comfortable for everyday use. It offers a 1.74-inch AMOLED display with brightness of up to 2000 nits, over 200 watch faces and more than 150 sports modes. Built-in GNSS lets you track routes without a phone, while 24-hour monitoring of heart rate, SpO2, stress and sleep helps you better manage fitness and recovery. Thanks to NFC, it supports Xiaomi Pay payments, displays notifications and works with Mi Fitness. The battery lasts up to 21 days, and 5 ATM water resistance increases the device's versatility.

Full product description

Xiaomi Smart Band 10 Pro NFC - everyday support on your wrist

Xiaomi Smart Band 10 Pro NFC combines activity and health monitoring functions with notifications and contactless payments. The slim 9.7 mm body and weight of 21.6 g without the strap make the band a comfortable companion during work, training, rest and sleep. The aluminium frame and curved 2.5D glass create a cohesive design suited to everyday use.

Large AMOLED display with high brightness

The band is equipped with a 1.74-inch AMOLED display with a resolution of 480 × 336 pixels and a refresh rate of up to 60 Hz. Peak brightness of up to 2000 nits and full-screen HBM brightness of up to 1500 nits help you read the time, workout stats and notifications comfortably, even outdoors. The user can choose from over 200 watch faces, matching the look of the screen to the occasion or personal preferences.

Over 150 sports modes and independent GNSS positioning

Xiaomi Smart Band 10 Pro NFC supports over 150 sports modes, making it possible to record many types of activity. The built-in GNSS chip works with GPS, GLONASS, BeiDou, Galileo and QZSS systems, allowing you to save outdoor workout routes without needing to use the phone's positioning. The band also offers a stadium running mode, running courses, pace matching and 3D warm-up and cool-down guides.

Heart rate, sleep and recovery monitoring

The band enables 24-hour monitoring of heart rate, blood oxygen and stress levels after activating the relevant functions. Sleep analysis includes, among other things, sleep stages, rest time, average heart rate and average HRV value during sleep, which helps you observe the body's recovery. The Mi Fitness app also provides weekly and monthly reports on sleep regularity, duration, quality and efficiency. Health functions are for informational purposes only and do not replace medical devices or a doctor's consultation.

Contactless payments using NFC

The built-in NFC module enables Xiaomi Pay contactless payments without needing to take out your phone or wallet. A card can be added and activated in the Mi Fitness app, and then payments can be made by holding the band near the terminal. The function works at terminals supporting Mastercard or Visa payments, while the availability of the service, supported cards and banks depends on the country and the card issuer.

Notifications and mobile device compatibility

When connected to a smartphone, Xiaomi Smart Band 10 Pro NFC displays notifications about messages, calls and alerts. The dual-device message synchronisation function allows you to receive notifications simultaneously from a compatible Xiaomi phone and an iPhone, provided that supported system versions, the Interconnectivity app and the same Xiaomi account are used. Bluetooth 5.4 connectivity and the Mi Fitness app allow you to view saved data, set band functions and manage watch faces.

Up to 21 days of battery life and 5 ATM water resistance

The 350 mAh battery offers up to 21 days of battery life in light use mode, up to 15 days during typical use and up to 8 days with the Always-on-Display screen active. The magnetic charging system makes it easy to connect the band to the cable. The 5 ATM water resistance rating allows the device to be used while swimming in a pool, near the shore and during activities in shallow water. The band should not be used while diving, in a sauna, under a hot shower or during sports involving a strong water jet.

Specification

Parameter	Details
Model	Xiaomi Smart Band 10 Pro NFC
Display	AMOLED, 1.74 inches
Resolution	480 × 336 pixels
Refresh rate	Up to 60 Hz
Screen brightness	Up to 2000 nits peak brightness, up to 1500 nits HBM
Frame material	High-strength aluminium
Screen cover material	Curved 2.5D glass
Standard strap material	TPU
Standard version dimensions	42.83 × 32.16 × 9.7 mm, excluding protruding elements
Standard version weight	21.6 g without the strap
Wrist circumference fit	135–205 mm
Sports modes	Over 150
Satellite positioning	GPS, GLONASS, BeiDou, Galileo and QZSS
Monitoring functions	Heart rate, blood oxygen, stress, sleep, HRV during sleep and menstrual health
Sensors	Optical heart rate and SpO ₂ sensor, accelerometer, gyroscope, electronic compass and ambient light sensor
NFC	Xiaomi Pay contactless payments; availability depends on region, bank and supported card
Water resistance	5 ATM
Battery capacity	350 mAh
Declared battery life	Up to 21 days with light use, up to 15 days with typical use, up to 8 days with AOD
Charging method	Magnetic charging
Connectivity	Bluetooth 5.4
App	Mi Fitness
Compatibility	Android 8.0 or later, iOS 14 or later
