### Information:

The TK-X4SC motorcycle intercom with a clear LED display shows, among other things, battery status, Bluetooth mode, intercom pairing, FM channel and smartphone connection. It supports group communication for up to 6 people over a distance of up to 2000 m, and one-touch pairing for 4 users makes it easy to start riding quickly. Noise reduction technologies, DSP and CVC provide clearer sound even in noisy conditions. Bluetooth 5.1 enables calls, music listening, music sharing, FM radio and a voice assistant. The IP67 rating increases resistance to weather conditions, and the 800 mAh battery offers up to 40 hours of operation. The set includes two microphones and mounting accessories.

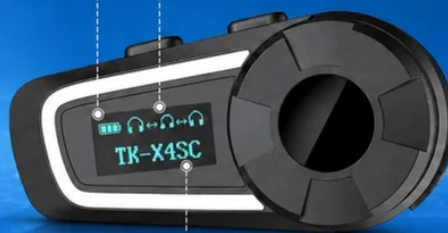

### Full product description

#### Clear display

The built-in LED display lets you quickly check the most important information while using the device. It shows, among other things, battery status, Bluetooth connection mode, intercom pairing status, FM radio channel and information about the smartphone connection. Intercom voice prompts are available in Polish, which makes operation easier while riding.

## Connectivity for a group

The TK-X4SC intercom enables motorcycle communication in a group of up to 6 people over a distance of up to 2000 m. The group intercom function allows conversations during a shared ride, while one-touch pairing for 4 people makes it easy to quickly establish a connection between trip participants.

## Interkom grupowy dla 6 osób – 2000 m Parowanie jednym dotknięciem dla 4 osób

## Clear riding sound

Microphone noise reduction, DSP and CVC technologies help reduce interference generated while riding. The sound processing system enables conversations with clearer voice transmission even in environments with a higher noise level. The intercom is ideal for daily commutes, trips and longer journeys.

## Features for every journey

Bluetooth 5.1 connectivity allows the intercom to be paired with a smartphone, making phone calls and listening to music. The device also offers music sharing, FM radio and voice assistant support. The IP67-rated housing helps protect the intercom when used in changing weather conditions.

## Long operating time

The 800 mAh battery offers up to 40 hours of operation and up to 17 days in standby mode. Charging the device takes around 2.5 hours, allowing you to quickly prepare the intercom for the next ride or a longer motorcycle trip.

## Complete set

The TK-X4SC set includes the elements needed to install and use the motorcycle intercom. Two types of microphones allow the equipment to be matched to the design of the helmet being used.
