Manufacturer: EXTRALINK

Referention number: DNXGKPNQJRMNJQ

Information:

The massage chair with Zero Gravity position provides deep relaxation and relieves the spine thanks to the adjustable backrest, enclosed design and armrests that support the natural position of the arms. The SL Track mechanism massages from the neck to the buttocks, offering up-and-down movement, kneading, shoulder position detection and 16 automatic programmes and 8 manual ones. 16 air cushions, leg and foot massage, back and leg heating and the Thai Stretch programme increase comfort and help relax the muscles. Convenient control is provided by AI voice control, a joystick, a quick-access button and a screen, while Hi-Fi Bluetooth, a phone or iPad holder, USB and wireless charging enhance functionality.

Full product description

Zero Gravity Position

The chair allows free adjustment of the backrest angle and adoption of the Zero Gravity position, which helps distribute body weight evenly and relieve pressure on the spine during the session. Capsule-shaped armrests support the natural position of the arms, while the enclosed design promotes comfortable quiet relaxation and rest.

SL Track Massage

The SL Track mechanism delivers massage from the neck through the back and waist to the buttocks, covering a long section of the body with a single programme. The system performs up-and-down movement and kneading, while the shoulder position detection function makes it easier to adapt the mechanism's operation to the user's body shape. There are 16 automatic modes and 8 manual modes available.

16 Airbags

The 16-airbag system covers the whole body and allows the pressure intensity to be adjusted according to individual preferences. Separate zones provide leg massage, while the foot massager helps relax them after a long day. The foot section has been fitted with durable plastic components.

Heat and Thai Stretch Programme

Back and leg heating combines massage with pleasant warmth, supporting the relaxation of tense areas of the body. The Thai Stretch programme uses stretching sequences inspired by Thai massage, helping to loosen muscles and add variety to the session. The health monitoring function also allows heart rate to be checked.

Convenient Control

AI voice control, a quick-access button located on the armrest and a joystick allow convenient adjustment of settings. The clear display makes it easy to select the programme, intensity level and other chair functions.

Multimedia and Additional Conveniences

A holder for a phone or iPad allows you to use the device while relaxing. Bluetooth connectivity with Hi-Fi surround sound makes it possible to listen to music, while the USB port and wireless charging help top up compatible mobile devices.

Package Contents

The set includes 1 × massage chair with SL Track mechanism, 16 airbags, leg and foot massager, heating function, Bluetooth connectivity, heart rate measurement and AI voice control. The chair also integrates a display, joystick, quick-access button, phone or iPad holder, USB port and wireless charging.
