**Information:**

LOVRO Bloomlight Freeze-Dried Highlighter 01 Champagne Diamond is a highlighter in a classic champagne shade that softly reflects light and gives the skin a fresh, elegant finish. It enhances the cheekbones, temples, brow bone and Cupid's bow without a heavy effect. The freeze-dried, lightweight formula blends easily into the skin, does not overly emphasise its texture and allows the intensity of the glow to be built up. It works well both in subtle daytime make-up and for a stronger evening effect.

**Full product description**

**Champagne Glow**

LOVRO Bloomlight Freeze-Dried Highlighter 01 Champagne Diamond is a highlighter in a classic champagne shade. It softly reflects light, enhances facial features and gives the skin a fresh, elegant finish.

### **Subtly enhances features**

You can apply the highlighter to the cheekbones, temples, brow bone and Cupid's bow. The luminous finish helps accentuate selected areas of the face without the effect of a heavy layer of make-up.

### **For different skin tones**

The champagne shade blends softly with different skin tones. The intensity of the glow can be built up, so the product works well both in light everyday make-up and when creating a stronger evening effect.

### **Light formula**

The airy formula achieved through the freeze-drying process blends softly with the skin. It leaves a clean, luminous glow without a feeling of heaviness and without over-emphasising the texture of the make-up.

### **Soft texture**

The delicate texture spreads easily on the skin and allows thin layers to be applied. The product lets you achieve a subtle glow or gradually build a more visible, glass-like radiance.

## How to apply

Take a small amount of highlighter with your finger or a brush, then apply it to the areas of the face you want to emphasise. Gently blend the product and, if needed, add another layer.
