Manufacturer: LOVRO

Referention number: DNXGKQHJMRMMNL

Information:

Bronze & Blush Set Lovro is a face-sculpting duo combining bronzer and a muted blush in one compact case. Two harmonious shades help accentuate the cheekbones, jawline and facial contours, while adding freshness and a radiant look to the complexion. The silky, talc-free formulas spread easily, blend softly into the skin and allow you to build the intensity of your make-up. The set is ideal for a subtle everyday effect as well as more defined contouring.

Full product description

Shaping Duo

Bronze & Blush Set Lovro combines a sculpting bronzer and a muted blush that helps restore a fresh look to the complexion. Two harmonious shades allow you to define facial features and create a cohesive make-up look.

Natural effect

The bronzer helps define the cheekbones, jawline and facial contours. The blush adds colour to the cheeks and makes the complexion look fresh and radiant.

Silky formula

The talc-free formulas have a silky texture that blends softly into the skin. The carefully balanced pigmentation makes it easy to build up the colour intensity.

Two harmonious shades

The colours have been selected to complement each other and suit many skin tones. You can use them separately or combine them in one face make-up look.

Easy application

The formulas spread easily on the skin and allow the colour edges to be blended softly. This makes it possible to create a subtle daytime make-up look or gradually build a more defined effect.

Compact format

The bronzer and blush are enclosed in one compact case that fits easily into a make-up bag or handbag. You can keep the set close at hand for everyday make-up, travel or quick touch-ups.
