Information:

LOVRO Bubble Foundation is a light, airy foundation with a brightening formula that blends softly into the skin, evens out the complexion and gives a fresh, natural finish without a heavy layer effect. It visually smooths the complexion, enhances its radiance and helps achieve a rested-looking skin with a soft glow. It allows buildable coverage from subtle to fuller, making it easy to tailor the effect to your needs without weighing the skin down. The flexible texture spreads well and ensures comfortable wear and an even, natural look.

Full product description

Lightness enclosed in a foundation

LOVRO Bubble Foundation is a foundation with an airy, illuminating formula. It blends softly into the skin, evens out its tone and leaves a fresh finish without the effect of a heavy layer.

Radiant and smooth complexion

The lightweight consistency visually smooths the skin and brings out its natural radiance. It helps achieve the effect of a rested, fresh complexion with a soft, caring glow.

Coverage tailored to your needs

The formula allows buildable coverage - from subtle tone evening to stronger concealment of selected imperfections. Additional thin layers let you tailor the effect without weighing down the skin.

Flexible formula

The airy consistency spreads easily across the face and adapts to the skin. It creates an even, naturally looking finish without a mask-like effect, while ensuring comfortable wear.

Natural finish

The foundation helps achieve a smooth transition between the skin and make-up. The luminous finish enlivens the complexion, and a small amount of product is enough to evenly cover the face.

Application method

Shake the bottle before use. Apply a small amount of foundation with your fingers, a sponge or a brush. In areas requiring stronger coverage, apply another thin layer.
