Information:

LOVRO Bubble Foundation is a lightweight, airy foundation with a brightening formula that blends softly into the skin, evens out the complexion and provides a fresh, natural finish without a heavy-layer effect. It visually smooths the complexion, enhances its radiance and helps achieve a glowing, rested look. Buildable coverage allows you to create the effect from a subtle evening-out to stronger concealment of imperfections, while the flexible texture spreads easily and ensures comfortable wear throughout the day.

Full product description

Lightness enclosed in a foundation

LOVRO Bubble Foundation is a foundation with an airy, illuminating formula. It blends softly into the skin, evens out its tone and leaves a fresh finish without the effect of a heavy layer.

Radiant and smooth complexion

The lightweight consistency visually smooths the skin and brings out its natural glow. It helps achieve the effect of a rested, fresh complexion with a soft, skincare-like glow.

Buildable coverage

The formula allows you to build coverage - from light tone evening to stronger concealment of selected imperfections. Additional thin layers let you tailor the effect without weighing down the skin.

Flexible formula

The airy consistency spreads easily across the face and adapts to the skin. It creates an even, naturally looking finish without a mask-like effect and helps maintain comfort while wearing make-up.

Luminous finish

The foundation helps achieve a smooth transition between the skin and make-up. Subtle radiance enlivens the complexion, and the efficient formula means a small amount is enough to evenly cover the face.

How to apply

Shake the packaging before use. Apply a small amount of foundation with your fingers, a sponge or a brush. In areas requiring stronger coverage, apply another thin layer.
