Manufacturer: LOVRO

Referention number: DNKGKQHKIRMMKN

Information:

LOVRO Highlighter Paste is a creamy face highlighter with a capacity of 8 g that gives the skin an intense, wet glow and enhances make-up features. The bouncy formula melts into the skin with the warmth of the face, so it can be applied comfortably with fingers or a brush and built up in layers. Subtle particles add radiance to the complexion without heavy coverage. The product is suitable for the cheekbones, bridge of the nose, Cupid's bow, as well as the décolletage and other areas of the body.

Full product description

Light on the skin

LOVRO Highlighter Paste is a creamy face highlighter with a capacity of 8 g, designed to enhance selected areas of make-up with an intense, luminous finish. The creamy, bouncy formula blends easily with the skin, creating a wet-look glow. The product is ideal for accentuating the cheekbones, the bridge of the nose and the cupid's bow.

Creamy, bouncy texture

The bouncy consistency allows the product to be applied comfortably and the intensity to be built up gradually. The highlighter can be gently tapped in with fingertips or applied using a suitable brush. The formula works with the warmth of the skin, so it blends easily into the finished make-up.

Wet-look glow

LOVRO Highlighter Paste creates a striking wet-look glow on the skin that enhances the natural play of light. The subtle particles in the formula add radiance and visual dimension to the complexion. The intensity of the finish can be adjusted by adding further thin layers of the product.

Subtle particles

The luminous particles help accentuate make-up without creating a heavy layer of colour. The lightweight formula allows for both a delicate glow and a more noticeable sheen. The compact packaging makes it easy to store the product in a make-up bag and use it while applying make-up.

Face, décolletage and body

The highlighter can be used not only on the face, but also on the décolletage and other selected areas of the body. Applied to places that naturally reflect light, it helps define contours and give the skin a luminous finish. The formula lets you control the level of glow depending on the amount of product used.

Application under control

A small amount of LOVRO Highlighter Paste should be applied to the cheekbones, the bridge of the nose or the cupid's bow, then gently tapped in or blended with a brush. Additional layers allow you to gradually increase the intensity of the glow. Applying the product to the décolletage helps complete the make-up with a cohesive, luminous accent.
