Information:

LOVRO Shimmer Eyeliner 02 Wine is a shimmering liquid eyeliner in a deep wine-red shade that gives the eyes an elegant and striking look. The sparkling particles beautifully reflect the light, creating a subtle or more intense metallic glow effect. The liquid formula makes it easy to build the line from a delicate lash line to a stronger graphic accent. The thin brush ensures precision and control over the thickness, and the product works well both on its own and with eyeshadows.

Full product description

Wine-coloured radiance

LOVRO Shimmer Eyeliner 02 Wine is a shimmering liquid eyeliner that enhances the eyes with a deep red wine shade. The luminous particles reflect light, giving the line an elegant character and a striking finish.

Particles full of light

The sparkling particles make the line change its appearance depending on the angle of the light. The eyeliner helps create a subtle luminous detail or a stronger accent that draws attention to the eyes.

Fluid line formula

The liquid formula allows you to build an effect suited to your make-up. You can draw a thin, shimmering line along the lashes or create a more visible element with a metallic glow.

Control over thickness

The thin brush makes it easier to guide the applicator and vary the thickness of the line. It lets you start with a delicate line and then build it up with further strokes for a more defined effect.

Solo or with eyeshadows

Shimmer Eyeliner can play the leading role in eye make-up or complement eyelid shading. The wine colour works well as a luminous detail along the lash line, in the outer corner or as a graphic accent.

How do you draw the line?

Guide the brush along the upper lash line, starting from the inner corner and moving outwards. You can gradually increase the thickness of the line, and for a more intense glow apply a second layer of the product.
