Price: **26.90 zł** gross / 21.87 zł net

Manufacturer: LOVRO

Referention number: DNXGKQHLFRMMIO

Information:

Wavy Lash is a mascara that, from the first coat, gives lashes striking volume, lifts and defines them, creating a soft, fluffy effect without clumping. The flexible silicone crescent-shaped brush coats lashes precisely from the roots, separates them and defines them along their full length. The lightweight, comfortable formula does not flake, smudge or weigh lashes down, so the make-up stays fresh all day. Available in deep black and rich brown, and warm water is enough to remove it.

Full product description

Full and lifted lashes

Wavy Lash is a mascara that gives lashes striking volume, lifts them and defines them after just the first coat. The formula helps achieve a soft, fluffy effect without clumping or weighing down the hairs.

Crescent-shaped brush

The flexible silicone brush has a crescent shape. Its concave side coats the lashes from the roots, while the convex side helps separate and define them along their full length.

Volume without clumping

The mascara coats the hairs evenly and allows you to build up the intensity of your make-up. The lashes remain separated, defined and fuller, while the eyes gain a striking look.

Comfortable formula

The flexible formula stays lightweight while worn, does not flake and does not smudge. It does not weigh down the lashes, so the make-up keeps its neat appearance throughout the day.

Striking colour

The mascara is available in two shades: deep black and rich brown. It lets you match the intensity of your make-up to your everyday look or a stronger eye definition.

Easy removal

The eye-friendly formula can be easily removed using warm water. This allows make-up to be washed off quickly without vigorous rubbing around the eyes.
