Information:

LOVRO Wet Glow is a multifunctional all-over highlighter that gives make-up a warm, jewellery-like glow with a golden hour and wet look effect. It can be used on the eyes, face and body to accentuate the cheekbones, eyelids and décolleté. Light-reflecting particles provide a luminous, wet finish, and the intensity of the effect can be built up in layers — from subtle radiance to striking glamour. The compact beige 4,5 g packaging makes it easy to store and touch up throughout the day.

Full product description

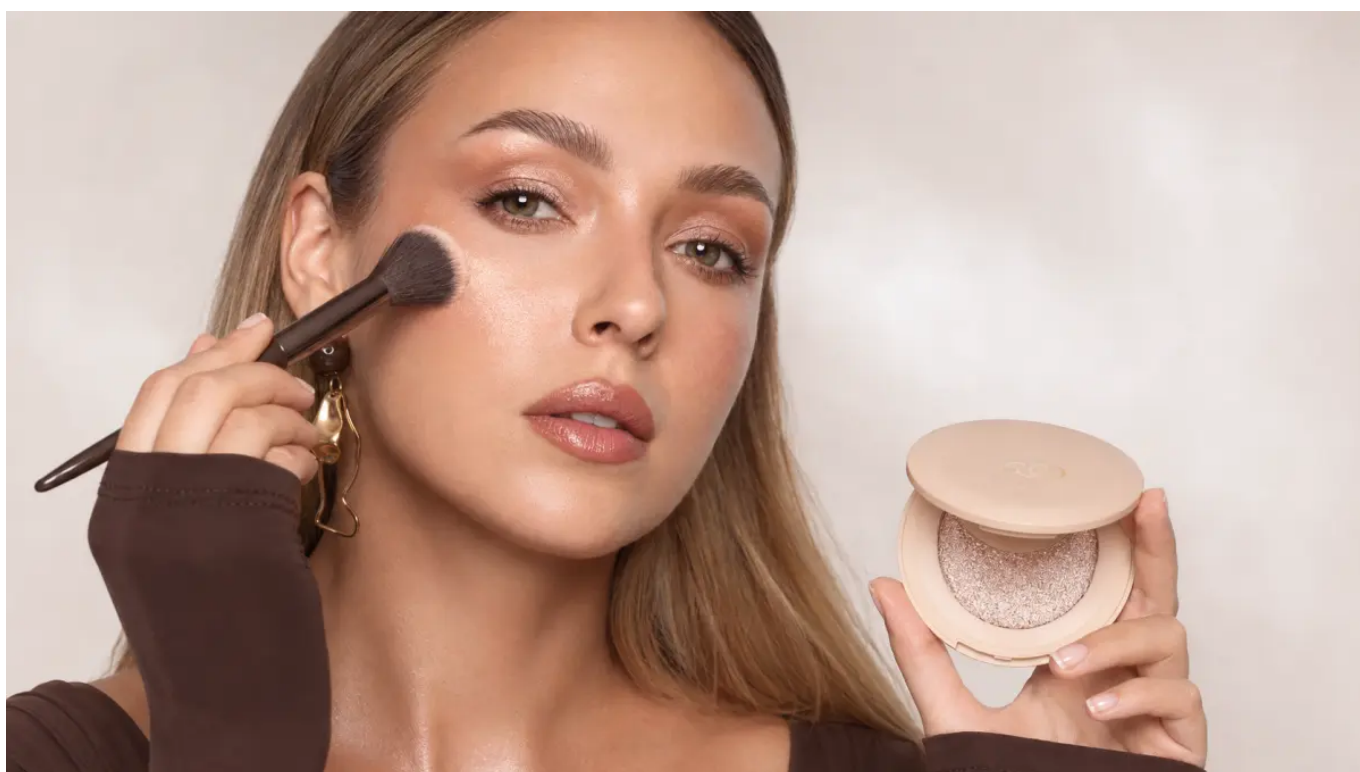

Glow in a golden hour style

LOVRO Wet Glow is a multifunctional all-over highlighter that enhances make-up with a warm, jewellery-like sheen. Light-reflecting particles create an effect reminiscent of skin kissed by the sun's rays during the golden hour. The product can be used on the eyes, face and body.

Face radiance

Applied to the cheekbones, Wet Glow helps accentuate facial features and gives the complexion a luminous finish. The shimmering formula reflects light exactly where needed, creating a wet-look effect. The highlighter can be applied with a brush or fingertips.

Make-up without limits

The multifunctional use means that one cosmetic product can enhance the eyelids, cheekbones and décolletage. On the eyes it creates a luminous effect, while on the face and body it turns into a striking layer of shimmering particles. Wet Glow works equally well as a subtle accent and as part of evening make-up.

Wet-look effect

The shimmering surface of the highlighter is made up of intensely light-reflecting particles. After application, they create a jewellery-like glow and help achieve the characteristic wet-look finish. The warm colour palette works beautifully with make-up in gold, brown and neutral tones.

Handy packaging

LOVRO Wet Glow comes in a round, beige compact that protects the product and makes it easy to store in a make-up bag. Its compact format means you can keep the highlighter close at hand during everyday make-up and for touch-ups away from home. The product weighs 4.5 g.

Adjust the intensity

The intensity of the shine can be tailored to the make-up you are creating. A small amount of product gives a delicate glow, while additional layers intensify the particle effect and wet-look finish. This means Wet Glow allows you to create both light daytime looks and a bold glamour effect.
