Manufacturer: POPPY HEAD

Referention number: DNXGKQHOLRMNGM

Information:

Poppy Head Browsome 01 Soft Taupe is a creamy eyebrow pencil that makes it easy to shape the brows, fill in sparse areas and define the natural arch without an overdone effect. The cool, neutral Soft Taupe shade blends harmoniously with the brow colour, delivering a subtle, polished everyday finish. The oval-flattened tip makes it easy both to quickly fill larger areas and to contour precisely, while the flexible brush helps comb through the hairs, soften lines and blend the colour evenly.

Full product description

Brows in a few strokes

Poppy Head Browsome 01 Soft Taupe is a creamy pencil that helps shape the brows, fill in visible sparse areas and define the natural arch. It allows you to build up the colour intensity without an overdone effect.

Shade 01 Soft Taupe

The cool, neutral Soft Taupe shade harmonises with the natural brow colour. It lets you subtly accentuate the hairs and achieve a polished finish suitable for everyday makeup.

Oval tip

The elongated, oval-flattened tip makes it easy both to fill larger areas and to define individual sections of the brows. Its shape allows you to comfortably adapt the application method to your needs.

Fill and contour

The wider side of the tip helps quickly fill in the brows and define their arch. The narrower edge allows you to refine the brow tail, the lower line and areas that require more precise application.

Brow brush

The flexible brush on the other side of the pencil combs through the hairs and helps distribute the colour evenly. It can soften sharp lines and give the brows a more natural look.

Application method

Use the wider side of the tip to fill in the brows and emphasise their arch. Use the narrower edge to define the contour and refine the tail. Finally, comb through the hairs with the brush to blend the colour.
