Manufacturer: POPPY HEAD

Referention number: DNKGKQHOMRMNHL

Information:

Poppy Head Browsome 02 Neutral Brown is a creamy eyebrow pencil in a cool, neutral brown shade that helps shape the brows, fill in gaps and enhance the natural arch without an overdone effect. The oval, flattened tip makes it easy both to quickly fill larger areas and to precisely define the contour and ends of the brows. The flexible brush on the other side combs through the hairs, evenly distributes the colour and softens lines, ensuring a natural finish.

Full product description

Brows in a few strokes

Poppy Head Browsome 02 Neutral Brown is a creamy pencil that helps shape the brows, fill in visible gaps and define the natural arch. It allows you to build up colour intensity without an overdone effect.

Neutral Brown shade

The cool, neutral brown shade blends harmoniously with the natural colour of the hairs. It helps fill in sparse areas and accentuate the brows while keeping their natural look.

Oval tip

The elongated, oval-flattened tip makes it easier to fill larger areas and emphasise selected parts of the brows. Its shape lets you adapt the application method to the desired effect.

Fill and contour

The wider side of the tip helps you quickly fill in the brows and accentuate their arch. The narrower edge makes it possible to define the contour, refine the tail and apply colour to selected areas.

Eyebrow brush

The flexible brush on the other side of the pencil combs through the hairs and helps distribute the colour evenly. It softens sharp lines and gives a more natural finish.

How to apply

Use the wider side of the tip to fill in the brows and define their arch. Use the narrower edge to outline the contour and refine the details. Finally, brush through the hairs to blend the colour.
