Manufacturer: POPPY HEAD

Referention number: DNXGKQHODRMMJK

Information:

Brightening and correcting under-eye concealer with a light, creamy formula provides medium, buildable coverage and a natural, slightly luminous finish. It helps conceal dark circles, even out skin tone and optically smooth the skin thanks to a soft focus effect. It does not feel heavy, does not dry out the skin and helps reduce settling into lines and wrinkles. The included brush makes quick, precise blending easy, ideal for everyday make-up and touch-ups throughout the day.

Full product description

Correction and brightening

Correct, conceal, brighten — one swipe.

The brightening and correcting under-eye concealer offers medium coverage with buildable intensity. Its ultra-light formula helps hide dark circles, even out skin tone and restore a fresh look to the eyes without a heavy feel.

Natural finish

A lightly luminous finish with a soft-focus effect optically smooths the skin under the eyes. The concealer does not create a mask-like effect, so the make-up looks light and natural.

Ultra-light formula

The creamy texture blends easily into the skin, does not dry it out and helps prevent the product settling into lines and wrinkles. It leaves the eye area soft and optically smoothed.

Buildable coverage

The concealer allows you to gradually increase the coverage by applying thin layers. It helps neutralise signs of fatigue and conceal imperfections without weighing the skin down.

Blending brush

The included brush makes it easy to apply the product quickly and evenly. The compact set is ideal for everyday make-up and touch-ups away from home.

Directions for use

Apply a small amount of concealer under the eyes, on the eyelids or to areas that need correction. Spread it with the applicator, then blend it with the included brush, your finger or a sponge. If needed, add another thin layer.
