Information:

POPPY HEAD Gelusion Eyeliner 01 Darkspell is a gel eyeliner in an ultra-intense, deep black shade that enhances the eyes and allows you to create both subtle and bold looks. The creamy gel formula applies smoothly, makes it easy to draw precise lines and build intensity. Once set, it is waterproof and smudge-resistant, so the make-up lasts for many hours. The built-in brush ensures convenient, controlled application and quick touch-ups.

Full product description

Ultra-intense black

POPPY HEAD Gelusion Eyeliner 01 Darkspell is a gel eyeliner in a deep, intensely black shade. The striking colour enhances the eyes and works well for both a subtle line and a bolder eye look.

Cream-gel formula

The soft texture glides smoothly over the eyelid, making it easy to draw an even line without tugging the skin. The formula allows you to build the shape and intensity of your make-up with ease.

A line in your style

Gelusion lets you create a thin line along the lashes, a classic wing, or more striking graphic shapes. The easy-to-spread texture helps you control every stage of application.

Smudge resistance

Once set, the waterproof formula stays in place and is resistant to smudging. The saturated black retains its intensity, helping to keep the line looking bold for many hours.

Brush in the packaging

The built-in brush allows you to draw both thin and thicker lines with ease. The practical design means the applicator is always at hand when applying make-up and making quick touch-ups.

How to apply

Pick up a small amount of product with the built-in brush and gently spread it on the back of your hand or inside the cap to coat the bristles evenly. Draw a line along the lash line or create a more defined shape, then allow the formula to set.
