Manufacturer: POPPY HEAD

Referention number: DNXXGKQHQLRMNII

Information:

Poppy Head is a compact palette of three coordinated eyeshadows that lets you quickly create a complete eye look without having to think about colour matching. It contains soft, richly pigmented mattes and luminous shimmers with fine particles that are easy to apply, blend and enhance the eyes. The shades can be worn separately or combined to create both a subtle daytime look and a more defined evening look. Its small format means the palette fits perfectly in a make-up bag or handbag, making it ideal for travel and quick touch-ups during the day.

Full product description

Just enough. Always right.

Three shades that create the entire eye look. The Poppy Head palette lets you create quick make-up without unnecessary steps or having to think about matching shades. The colours have been paired so they can be used separately or combined into a cohesive whole.

Soft mattes and shimmer

Soft, richly pigmented mattes apply easily to the eyelid and help create smooth transitions between colours. Luminous shadows with particles reflect light, making it easy to enhance the eyes in both everyday and evening make-up.

Three matching shades

The palette contains three shades that complement one another. You can apply one colour across the entire eyelid, combine two shades, or use all three to create a complete eye look. It is a simple way to achieve a polished effect without guessing which colours go together.

Compact palette

The small format means you can always have the palette to hand. It fits easily into a make-up bag or handbag, so it is ideal for trips, quick make-up and touch-ups during the day.

Effortless make-up

The thoughtfully selected colours make it possible to create subtle daytime make-up or a stronger eye look. The formulas blend easily together, and the luminous finish helps add striking radiance to the eyelids.

Simple application method

Apply the shade of your choice or combine all three, depending on the effect you want. Apply and blend the matte shadows with a brush, while the shimmer shades can be tapped on with your fingertip to emphasise their luminous finish. It really is just enough.
